1. About Chang Gung University

Chang Gung University (CGU), a contemporary and research-directed university with entrepreneurial spirits, was established by the founding Wang family of the Formosa Plastics Group in the northern Taiwan. CGU is highly ranked globally in the QS World Universities Rankings 2022, and in the top 5 among the 151 universities in Taiwan. CGU has 4 colleges: College of Medicine, College of Engineering, College of Management, and College of Computing. CGU offers a student-faculty ratio of 11:1, with 6,777 students, 593 full-time faculty, and 665 adjunct faculty members. The University strives for excellence in research, teaching, and innovative technology commercialization. Under close ties with the Formosa Plastics Group and the Chang Gung Medical Foundation (the largest hospital system in Taiwan), CGU enjoys abundant research resources on manufacturing and medical services and has established itself as a top-class university that prepares its graduates for personal and professional success.

Over the years, CGU has extended research collaboration and academic exchange programs with nearly 100 overseas universities in the USA, Japan, Australia, Hong Kong, Singapore, and France. CGU campus is as a global village, providing genuine English learning environment and with state-of-the-art laboratory facilities, eco-friendly and convenient learning and living environments with free shuttle bus services to and fro public transit stations, the hospital, and shopping areas. CGU is located in the suburban area of the Taipei city, about 25 minutes to the city center by Taiwan’s Metro Rapid Transit.

For more information about CGU, please refer to the website and media channels: <https://www.cgu.edu.tw/index.php?Lang=en>

2. Application Procedure

Step 1.	Eligibility
	<p>Please make sure that you are eligible to apply as an international student and read the instructions carefully.</p> <p>The prospective applicants have to refer to the link below “MOE Regulations Regarding International Students Undertaking Studies in Taiwan”.</p> <p>https://edu.law.moe.gov.tw/EngLawContent.aspx?lan=E&id=288</p> <p>* Applications that do not meet any of the above-mentioned criteria will not be processed.</p>
Step 2.	Online registration & Prepare all the required documents
	<p>Please refer to Section 3 and Section 4 for more information of how to apply for our programs. Online registration link listed in Step 3.</p>
Step 3.	Submit the completed application to CGU
	<p>Please apply online via application website</p> <p>https://www4.is.cgu.edu.tw/aplforis/</p> <p>Set up an account and upload required documents to the online application.</p> <p>(Applicants may “save” & revise the application multiple times before application is submitted.)</p> <p>Fees: TWD\$1,500 (USD\$50)</p> <p>Unpaid applications will not be processed. Once the payment is made, it is not refundable.</p> <p>Please upload the payment receipt to the online application website after the transfer has been made. (DO NOT SEND CASH)</p>

*** Application Timetable 2023-2024***

Schedule of Events	Dates	
On-line Application	Fall Admission: 1st Round: December 6, 2022 ~ February 12, 2023 2nd Round: February 26, 2023 ~ April 23, 2023 3rd Round: May 7, 2023 ~ June 25, 2023	Spring Admission: August 1, 2023 ~ September 30, 2023
Review and Evaluation by Departments/ Graduate Institutes	Fall Admission: 1st Round: February 20, 2023 ~ March 10, 2023 2nd Round: May 1, 2023 ~ May 19, 2023 3rd Round: July 3, 2023 ~ July 14, 2023	Spring Admission: October 9, 2023 ~ October 27, 2023
Application Results Posted on the CGU Website and Admission Letters Sent to Applicants	1. Fall Admission: 1st Round: March 27, 2023 2nd Round: June 5, 2023 3rd Round: July 31, 2023	Spring Admission: November 17, 2023
Reply Deadline for Accepted Applicants	Fall Admission: 1st Round: April 7, 2023 2nd Round: June 16, 2023 3rd Round: August 11, 2023	Spring Admission: December 1, 2023
Class Starts	Fall Admission: September, 2023	Spring Admission: February, 2024

NOTE:

The academic year (two semesters in each academic year) begins on August 1 and ends on July 31 of the following year. Fall term classes usually begin in mid- or late-September, and spring term classes begin in late February of the following year. Each semester consists of 18 weeks.

3. Application Guidelines

3.1 Eligibility: criteria are as follows

1. An individual of foreign nationality, who has never held a nationality status from the Republic of China and who does not possess an overseas Chinese student status at the time of his/her application, is qualified to apply for admission.
2. An individual of foreign nationality and has resided overseas (excluding Mainland China, Hong Kong, and Macau) for more than 6 consecutive years, 8 consecutive years for applying for School of Traditional Chinese Medicine, prior to August 1, 2023, and whose stays in Taiwan per calendar year do not exceed a total of 120 days, and must fulfill the following requirements:
 - An individual who has a nationality status from the Republic of China at the time of his/her birth but does not hold a household registration must state this on his/her application.
 - An individual who has had a nationality status from the Republic of China but has no R.O.C. nationality at the time of his/her application shall have an annulled status regarding his/her R.O.C. nationality for no less than 8 years after an annulment of his/her R.O.C. nationality by the Ministry of the Interior.
 - Regarding individuals mentioned in both of the above subparagraphs, they must not have studied in Taiwan under the status of an overseas Chinese nor received placement permission for an academic school year by the University Entrance Committee for Overseas Chinese Students.
3. An individual who once had R.O.C. nationality and applied to renounce R.O.C. nationality (prior to February 1, 2012) for at least 8 years since the date, on which a revocation was issued from the Ministry of the Interior, up to September 15, 2023.
4. An individual who has foreign nationality, concurrently holding a permanent residence status in Hong Kong or Macau, but has never held household registration in Taiwan since birth at the time of application, has resided in Hong Kong, Macao, or overseas (excluding Mainland China) for more than 6 consecutive years, 8 consecutive years for applying for School of Traditional Chinese Medicine, prior to August 1, 2023, and whose stays in Taiwan per calendar year do not exceed a total of 120 days.
5. An individual who was the former citizen of Mainland China and currently has foreign nationality, but has never held household registration in Taiwan since birth at the time of application, has resided overseas (excluding Mainland China, Hong Kong, and Macau) for more than 6 consecutive years, 8 consecutive years for applying for School of Traditional Chinese Medicine, prior to August 1, 2023 and whose stays in Taiwan per calendar year do not exceed a total of 120 days.
6. An individual who has been selected to study in Taiwan by a foreign government, organization, schools or educational/cultural group according to the Education Cooperation Framework Agreement and does not

hold the household registration since birth as well as receive the approval from the designated authorized government educational institutions.

7. An applicant with a high school diploma is eligible to apply for undergraduate programs (However, the applicant who has completed the courses of a study program in Taiwan as a foreign student is NOT eligible to apply for an undergraduate program); an applicant with a bachelor's degree is eligible to apply for master's degree programs; an applicant with a master's degree is eligible to apply for doctoral programs at CGU.
8. The most up-to-date version of the "MOE Regulations Regarding International Students Undertaking Studies in Taiwan" can be found on the Ministry of Education (MOE) website (<https://edu.law.moe.gov.tw/EngLawContent.aspx?lan=E&id=288>). Applicants are recommended to visit the website before submitting the application. If the MOE regulations are revised, the latest MOE regulations shall prevail. Regarding the calculation of the duration of overseas residence, CGU conforms to Articles 2 & 3 of the Regulations Regarding International Students Undertaking Studies in Taiwan" formulated by the Ministry of Education. The term "reside overseas continuously" means that an individual may stay in Taiwan for no more than a total of 120 days per calendar year.

R.O.C. nationality mentioned above is defined in accordance with Article 2 of Nationality Law. (See below) According to Article 2 of the Nationality Law, a person shall have the nationality of the Republic of China under any of the conditions provided by the following subparagraphs:

- His/ Her father or mother was a national of the Republic of China when he/she was born.
- He/ She was born after the death of his/her father or mother, and his/her father or mother was a national of the Republic of China at the time of death.
- He/ She was born in the territory of the Republic of China, and his/her parents cannot be ascertained or both were stateless persons.
- He/ She has undergone the nationalization process.

Preceding subparagraph 1 and subparagraph 2 shall also apply to the persons who were minors at the time of the revision and promulgation of the Act.

3.2. Application and Deadline for Submission (Taiwan Standard Time)

1. Application Dates and Deadline

(1) All programs:

Fall Admission:

1st Round: December 6, 2022 ~ February 12, 2023

2nd Round: February 26, 2023 ~ April 23, 2023

3rd Round: May 7, 2023 ~ June 25, 2023

Spring Admission: August 1, 2023 ~ September 30, 2023

(2) Apply Online:

Website: <https://www4.is.cgu.edu.tw/aplforis/>

Applicants should fill in the application form step by step online, and all required documents must be uploaded before the online application deadline.

Undergraduate programs are open for **FALL ADMISSION** only.

Application Deadlines:

Fall admission: February 12, 2023; April 23, 2023 and June 25, 2023

Spring admission: September 30, 2023

2. Required Documents for Application (all in electronic format, uploaded to the system)

- (1) One printed copy of the completed online application form with a 2-inch x 2-inch photo
- (2) Photocopy of the applicant's passport (First two pages) or a nationality certificate of the applicant.
(Individuals possessing ARC or other legal resident's certificates, please provide a photocopy of ARC if there's any)
- (3) A photocopy of the original graduation certificate of the highest academic degree verified by the issuing office/university (One notarized copy of the translation in English or Chinese is necessary if the original graduation certificate is not in English/Chinese). Please turn in an official certificate of your student status/expected graduation (English/Chinese) month issued by your current university and a photocopy of the student ID card, if you are going to graduate soon. Applicants with a bachelor's degree or above obtained from universities in Mainland China which are specifically recognized by the MOE are also required to submit the certificate of degree conferral.
- (4) Photocopy of the transcript/mark sheet of your highest academic degree verified by the issuing office/university (One notarized copy of the translation in English or Chinese is necessary if the original transcript / mark sheet is not in English or in Chinese). Please attach photocopies of ALL transcripts/mark sheets of your highest academic degree, if the grades/scores of all semesters/years are not in a single transcript/mark sheet.
- (5) Two letters of recommendation (subject to each department's requirements)
- (6) Bank statements or records of remittance provided by the applicant or his/her relatives within the third degree of kinship (grandparents, parents and siblings).
 - Bank statements or records of remittance supported by the applicant's relatives must be submitted along with the household registration/ birth certificate/ family book which may prove the relationship of relative.

- The amount showing on the bank statements or records of remittance, when the visa application is submitted, must be sufficient enough for at least a consecutive 6 months living needs.
- The scholarship certificate must indicate the duration and the exact amount of the scholarship.

(7) Language Proficiency Test

Applicants need to submit a TOEFL ITP score of 480 points or higher (or new TOEFL iBT score higher than 54 points), TOEIC 520, or an IELTS score of 4 points or higher within the past five years. For other English proficiency requirements, please refer to Section 4, Program wise Required Documents for more details. This requirement is waived for the applicants under the following circumstances:

- Applicants whose latest degree is obtained from an English-speaking country.
- Applicants who come from countries where English is the official language.

Applicants applying for undergraduate program are required to submit the certificate of Level 2 (A2) of the Test of Chinese as a Foreign Language (TOCFL) or New Chinese Proficiency Test (HSK) Level 4. Please visit <https://past.sc-top.org.tw/english/WR/over.php> for more details about the corresponding TOCFL bands and levels with the levels of CEFR.

Program wise other required documents by certain departments/graduate institutes. (Please refer to Section 4, Program wise Required Documents).

(8) Other merits for application, such as awards, distinguished performance, thesis..., etc. Current Taiwan scholarship recipients should submit a photocopy of the Taiwan scholarship award certificate.

Certificate of nationality renouncement of the Republic of China or Arrival-Departure Records (if applicable) Accepted applicants can enroll ONLY after they submit the photocopies of their diploma, certificate of degree conferral (applicable to the applicants with the bachelor's degree or above obtained from universities in Mainland China which are specifically recognized by the MOE) as well as transcripts and other relevant academic certificates which should all be verified by the related offices according to the following regulations before the date appointed.

- Students whose degrees are conferred by foreign schools (excluding the schools in Hong Kong, Macau, and Mainland China) shall follow the "Regulations Regarding the Assessment and Recognition of Foreign Academic Credentials for Institutions of Higher Education".
- Students whose degrees are conferred by schools in Hong Kong or Macau which are specifically recognized by the MOE shall follow the "Academic Credential Verification and Accreditation Methods adopted in Hong Kong and Macau".
- Students whose degrees are conferred by schools in Mainland China shall follow the "Regulations Governing the Accreditation of Schools in Mainland China".

3. Notes to all Applicants

- (1) Each applicant can apply for two departments/graduate institutes/ programs at most.
- (2) According to Article 2 of the “Regulations Regarding Study and Counseling Assistance for Overseas Chinese Students in Taiwan”, verification of overseas Chinese student status can only be granted by the authorities at the Overseas Compatriots Affairs Commission. During the course of study, the overseas Chinese student may not change his or her student status, unless otherwise permitted by other regulations. According to Article 21 of the above regulation, the students stipulated below will lose their status as an overseas Chinese student, if they stay in Taiwan over one year and do not continue their education: Graduated, Expelled or Dropped out. Students whose status is temporarily suspended will resume their status upon returning to school.
- (3) Applicants admitted to CGU shall be revoked of their admission and/or dismissed from CGU if any defect is found in the applicants’ qualifications for application or in the authenticity of the documents submitted. Those who have graduated shall have their diploma revoked.
- (4) The acceptance letter to any program DOES NOT guarantee the issuance of a visa. A visa can be approved only by the Bureau of Consular Affairs, the Ministry of Foreign Affairs or Taiwan Overseas Representative Offices. Some Taiwan Overseas Representative Offices may require the applicants to submit the proof of Chinese Language Proficiency (enrolling in Chinese-taught programs) or proof of English Language Proficiency (enrolling in English-taught programs) for visa application. For the requirement of visa application, please contact the Taiwan Overseas Representative Office in/near your country.
- (5) According to the regulations of the MOE (Ministry of Education), those who have been approved to make Initial Household Registration, Moving-in Registration, or Acquisition or Restoration of Nationality during their study in Taiwan and have thus ceased to possess the status as foreign students, shall be expelled from any school they are attending. Moreover, those who withdraw or are expelled from school in the Republic of China due to misbehavior, unacceptable academic performance or conviction of a penal crime may not thereafter apply again for admission under the “Regulations Regarding International Students Undertaking Studies in Taiwan.” Violation of the regulations will result in the rejection of an application for admission.
- (6) International students’ applications for admission are based on the “Regulations Regarding Students Undertaking Studies in Taiwan” formulated by the Ministry of Education (MOE), the “CGU Study Regulations” and the “CGU 2023- 2024 Admission Guidelines for International Students”. If there are any discrepancies between the English and Chinese instructions, please follow the Chinese version.

3.3 Admission Quota, Program Duration and Scholarships

Program	Admission Quota	Program Duration
Undergraduate Programs	90	Within 4-6 years
Master Programs	90	Within 1-4 years
Ph.D. Programs	100	Within 2-7years

Scholarship / Financial Aid Information

- Master's and Doctoral Scholarships and Grants for International Students, for detailed guidelines, please visit the website: <https://oia.cgu.edu.tw/p/412-1015-12495.php?Lang=en>.
- Stipend for Teaching Assistantship or Research Assistantship may be obtained from college support or individual advisor.
- CGU Academic scholarship for outstanding students (Undergraduate Programs), for detailed guidelines, please visit the website: <https://oia.cgu.edu.tw/p/412-1015-12495.php?Lang=en#Academic>.
- Taiwan Scholarship (Government Agencies), please refer to the MOE web site for more information: <https://tafs.mofa.gov.tw/Contacts.aspx?loc=tw>.

3.4. Available Academic Programs

The following undergraduate and graduate programs are open for international students in the academic year 2023-2024.

College Name	Department / Graduate Institute	Program offered (marked by ●)		
		Under-graduate	Master	Ph.D.
College of Medicine	Department of Respiratory Therapy	●	●	
	International Master Degree Program for Molecular Medicine in Emerging Viral Infections		●	
	International Master of Science in Reconstructive Microsurgery		●	
	Department of Biomedical Sciences	●		
	Graduate Institute of Biomedical sciences		●	●
	Department of Medical Imaging and Radiological Sciences	●	●	●
	Graduate Institute of Dental and Craniofacial Science, Division of Craniofacial Dentistry		●	
	Graduate Institute of Dental and Craniofacial Science, Division of Craniofacial Surgery and Research		●	
	School of Traditional Chinese Medicine	●	●	●
	Graduate Institute of Natural Products		●	
	Department of Medical Biotechnology and Laboratory Science	●		
	School of Physical Therapy	●		
	Graduate Institute of Rehabilitation Science, School of Physical Therapy		●	●
	School of Nursing	●	●	●
	Graduate Institute of Early Intervention		●	
	Department of Occupational Therapy	●		
	Department of Occupational Therapy, Graduate Institute of Behavioral Sciences, Division of Occupational Therapy		●	

College Name	Department / Graduate Institute	Program offered (marked by ●)		
		Under-graduate	Master	Ph.D.
College of Engineering	Department of Chemical and Materials Engineering	●	●	●
	Graduate Institute of Electro-Optical Engineering		●	
	Graduate Institute of Biomedical Engineering		●	●
	Department of Electrical Engineering	●	●	●
	Department of Electronic Engineering	●	●	●
	Department of Computer Science and Information Engineering	●	●	●
	Department of Mechanical Engineering	●	●	●
	Master's Program in Nano-Electronic Engineering and Design (NEED)		●	
College of Management	Department of Health Care Management	●	●	
	Department of Industrial & Business Management	●	●	
	Department of Industrial Design	●	●	
	Department of Information Management	●	●	
	School of Business (MBA)		●	
	Graduate Institute of Management			●
College of Intelligent Computing	Department of Artificial Intelligence	●	●	

3.5. Screening Process and Follow Ups

The departmental or institutional admission committees will review the application materials to process an initial screening. If necessary, written exams or interviews will be incorporated. The CGU admission committee will process the final screening. The admission roster shall then be approved by the President of CGU. Notification will then be sent to each individual.

3.6. Admission Roster Announcement

Admission roster of accepted applicants will be announced on the website of CGU in the following dates appointed. It will be posted online (<https://oia.cgu.edu.tw/var/file/15/1015/img/2755/admission.html>).

A letter of admission will be mailed to admitted students individually.

All programs:

March 27, 2023; June 5, 2023 and July 31, 2023 for the Fall admission; November 17, 2023 for the Spring admission.

3.7. Registration

1. Admitted students shall be present at the university for registration on the date specified and present the original copy of passport, diploma and the Chinese or English translation of school transcripts authenticated by ROC representative offices abroad (for authentication purpose only, documents will be returned immediately), or the status of admission shall be revoked. Admitted students should register on time and submit the above documents upon registration, or the status of admission shall be revoked.
2. According to Article 22 of “MOE Regulations Regarding International Students Undertaking Studies in Taiwan”, upon registration the admitted students should provide a proof of medical and personal accidental insurance papers insured outside ROC with validity from entering ROC up to at least six months. If already being insured at the national health insurance of ROC, **the enrolled students only need to provide a proof of the related insurance papers. The above-mentioned insurance papers issued outside the ROC should be authenticated by ROC representative offices abroad.**

3.8. Tuition & Fees

The actual tuition fees for the 2023-2024 academic year will be changed and announced by mid-August at <https://accounting.cgu.edu.tw/p/412-1006-90.php> (All fees shown are in New Taiwan Dollars)

Tel: 886-3-2118800 ext. 3049
Website: <https://oia.cgu.edu.tw/var/file/15/1015/img/2755/admission.html>
Email: cgu_fs@mail.cgu.edu.tw
- Information related to TA or RA stipend: please contact your department or institute office (After admission to CGU).
- Information related to study grant from the second semester onwards: please contact your department or institute of each college. Website: <https://www.cgu.edu.tw/index.php?Lang=en>

4. Departmental Requirements

4.1 College of Medicine

Department of Respiratory Therapy

In order to meet the strong demand for respiratory therapists in Taiwan, our Department in Chang Gung University, (the first one in the respiratory care field in Taiwan), was founded in September 1999 as a formal channel for students with medical related backgrounds to receive advanced education and training. The Department helps to elevate the quality of medical care in health care settings by training students.

The Department's curriculum emphasizes the teaching of respiratory care principles and professional techniques as well as providing students with the sufficient hands-on learning opportunities that they need to integrate their professional knowledge with their clinical practice. We also teach additional courses such as Sleep Medicine, Evidence-Based Health Care and Respiratory Care Seminars that aim to train students in problem-solving capabilities. Furthermore, our Department cooperates with Chang Gung Memorial Hospital to provide students with more practical experience. The affiliated hospital has the largest respiratory care division in the Department of Thoracic Medicine that includes a complete range of instruments, equipment, and excellent professional personnel with abundant experience.

International Master Degree Program for Molecular Medicine in Emerging Viral Infections

The International Master Degree Program for Molecular Medicine in Emerging Viral Infections is designed for international and domestic students with a background in biology, biomedicine, or biotechnology who wish to engage in vigorous training leading to a MS degree. Faculty members have expertise in the following areas: emerging virus, virology, biochemistry, molecular and cellular biology, microbiology, immunology, and various omics/systems biology disciplines such as genomics, proteomics, and bioinformatics.

Emerging viruses may be causative agents for disease outbreaks that threaten public health. Understanding the pathogenesis caused by emerging viruses at the molecular level and developing the prophylaxis and treatments against the viruses are crucial to prevent the outbreaks. The goal of this master degree program is to cultivate professional personnel in multidisciplinary research fields of emerging viruses and biomedicine. All lectures and laboratory courses are offered in English, and provide a breadth of concepts and research skills in modern biomedical fields. Students can also have access to the cutting-edge core facilities in the Research Center for Emerging Viral Infections and the Molecular Medicine Research Center at CGU.

Programs	Degree	Application Code	Session	Other required documents & Remarks
Master	Master of Science (M.S.)	2M07	Spring Fall	<ul style="list-style-type: none"> ◆ Additional application materials: <ol style="list-style-type: none"> 1. A copy of study plan (5 pages maximum) 2. International Master of Science in Reconstructive Microsurgery

The Plastic and Reconstructive Surgery Department of Chang Gung Memorial Hospital (CGMH), Taiwan, in conjunction with Chang Gung University (CGU), is proud to present the world's first accredited academic degree which combines both hands-on clinical microsurgery experience as a fellow coupled with a structured microsurgery curriculum.

The distinguishing feature of this master's program is that it provides clinical learning unparalleled to no other at present. Reconstructive microsurgery is best learnt in a safe, clinical environment and the CGU Master of Science program allows one to achieve that goal. With the largest number of microsurgical reconstructions in the world at a single institution, the collaboration between CGMH and CGU promises to bring microsurgery academia to newer heights. Participants can expect to be trained in not only concepts in reconstructive microsurgery but also hone their technical expertise in this field.

Programs	Degree	Application Code	Session	Other required documents & Remarks
Master	Master of Science in Reconstructive Microsurgery (M.S.)	2M17	Fall	Applicants should be qualified surgeons who have completed residency training for at least two years and should be granted with either clinical fellowship or basic research fellowship by the Division of Reconstructive Microsurgery of Chang Gung Memorial Hospital. ◆Additional application materials: Certificate issued by your formal employer (e.g. hospital), which needs to address the length of time (at least one year) in practicing medicine, the issued date shall be later than February 1 st of the academic year. ◆Remarks: This program is taught in English and is accredited by the MOE.

Department of Biomedical Sciences

CGUBS aims to cultivate high-level talent in the fields of biomedical science and biotechnology to become future leaders in the workforce. We hope to recruit students with a strong interest in biology, basic natural science training, and extensive extracurricular activities.

Our department has a strong research-oriented faculty, with extensive research directed at both basic and applied biomedicine, such as cancer biology, developmental biology, virology, bioinformatics/AI, drug development, and clinical trial assessment. Top-tier research resources, including high-end equipment, space, and funding are the basis for our excellent academic achievements.

The department's courses focus on important emerging fields of biomedicine, emphasizing the students' ability to conduct independent research. The curriculum also includes many interdisciplinary courses, internship opportunities in international pharmaceutical or biotechnology companies, as well as opportunities for study and research overseas.

Based on the variety of courses that encompass topics from basic research and biotechnology and to clinical trials, CGUBS offers three curricula: "Biomedical Research Program", "Biotechnology Industry Professional Program", and "Basic Clinical Trial Program". The students are free to enroll in one or more programs.

Programs	Degree	Application Code	Session	Other required documents & Remarks
Under-graduate	Bachelor of Science (B.S.)	3M08	Fall	◆Additional application materials: 1.Statement of purpose. 2.A virtual interview will be required for prospective candidate. ◆Remarks: Courses in this program are mainly conducted in Chinese. Applicants should be proficient in Chinese (reading, and listening), equivalent to TOCFL A2.

Graduate Institute of Biomedical Sciences

The Interdisciplinary Graduate Master's Program in the Graduate Institute of Biomedical Sciences (IGP-GIBMS) is a leading integrative biomedical graduate program involving four disciplines (Division of Biochemistry, Molecular & Cellular Biology; Division of Microbiology & Immunology; and Division of Physiology and Pharmacology, Division of Multi-Omics Informatics & Intelligence Computing), the IGP-GIBMS provides a strong foundation for advanced biomedical training and career development opportunities. Students admitted to the IGP-GIBMS may choose an adviser from among the professors who are members of the IGP-GIBMS.

Department of Medical Imaging and Radiological Sciences

The Department of Medical Imaging and Radiological Sciences provides an environment in which expertise and resources from the Chang Gung University and Hospitals are consolidated towards the goal of more effective and efficient education in medical imaging and radiological sciences. The educational goal of our program is to rigorously educate our students in diverse fields of medical imaging that are built on a strong foundation in engineering, physics, chemistry, mathematics and biology.

The Department of Medical Imaging and Radiological Sciences includes three major disciplines including radiological diagnosis, radiation therapy and nuclear medicine. Each of these disciplines contain various research and clinical sub-fields in medical imaging and therapy, and instruments in helping diagnosis and treating human disease, including MRI, PET/CT, SPECT, X-ray imaging, CT, ultrasound, radiation therapy, proton therapy, animal PET and SPECT. Particular focus is in-depth education in the medical physics and radiological sciences, particularly the applications of advanced technology in medical imaging to clinical diagnosis and treatment. The principal means of accomplishing these goals is through a comprehensive, interdisciplinary curriculum, which begins with a critical understanding of engineering, mathematics, chemistry, physics and biology, and builds towards state-of-the-art research and development in medical imaging and radiological sciences.

Graduate Institute of Dental and Craniofacial Science, Division of Craniofacial Dentistry

The three-year master program is designed to provide you with basic training and skills for the management of individuals with malocclusion, dentofacial deformities, cleft lip and palate, and craniofacial anomalies requiring orthodontic care.

In addition to a weekly orthodontic conference, you will take part in routine orthodontic treatment planning and treatment.

You will initiate and complete at least one clinical research project, supervised by craniofacial orthodontic or plastic surgery faculty members. The focus of the research includes dental and craniofacial imaging, biomechanics and tissue engineering.

School of Traditional Chinese Medicine

Senior Chinese medicine professors are invited to teach at the University and to share their rich experiences and accomplishments in the integration of Chinese and western medicine.

An excellent learning and research environment is provided for the training of doctors with attainments in modern medicine, technological information, and Chinese medicine.

Teaching, research, examination, clinical practice, and service are integrated as a whole.

Courses in western medicine are offered together with the Medicine Department of the University including medical fundamentals, clinical medicine, and practice courses.

School of Traditional Chinese Medicine

The Graduate Institute of Traditional Chinese Medicine was founded in 2000 and the admission of new students began in July 2001. The development of Chinese medicine and pharmacy is one of the medium-term goals of Chang Gung University. In order to promote the modernization and scientization of Chinese Medicine, we believe that by using the resources of and successes attained by the Graduate Institute of Basic Medical Science, the Graduate Institute of Clinical Medicine, the Graduate Institute of Natural Products, and Chang Gung Memorial Hospital, we'll be able, in the not too distant future, to produce experts in integrated Chinese and Western medicine in order to promote the modernization of Chinese Medicine.

Our purposes are:

1. Integration of traditional medicine and modern technology
2. Education of specialized personnel of advanced Chinese Medicine
3. The overall development of clinical education and research

Graduate Institute of Natural Products

We combine experts in natural product chemistry, medicinal chemistry, pharmacodynamics, pharmacology, molecular biology, biochemistry, biopharmaceutics, nanotechnology and pharmacokinetics to create a research team with integrated technology. Our major research fields comprise several areas.

1. The chemical and bioactive constituents of natural products.
2. The application of nanomedicine on natural products
3. The study of natural products in inflammatory and thrombosis.
4. To study the pharmacological activities of bioactive chemical compounds in order to develop better therapeutic strategies to treat immune-mediated inflammatory diseases.
5. Research and development of new drug
6. Drug repositioning of traditional Chinese medicines
7. The DNA repair targeted therapy and aging-associated diseases

School of Nursing

1. Excellent Research Energy

The research performance of our faculty members is excellent. Five of our faculty members in school of nursing rank among World's top 2% scientists in 2022. The School of Nursing at CGU was ranked Top 1 in Asia, Top 25 in the world in 2020 by Shanghai Ranking Consultancy.

Gerontology and oncology nursing are the two major focuses of our faculty's research. Emerging technology, such as AI and VR, has been applied into many of our faculty members' projects. We also have international collaboration with universities from various countries including the USA, Australia, UK, Belgium, Sweden and others.

2. International Student Friendly Environment

Stipends and scholarships are available for international graduate students. All doctoral courses are taught by English which is also the second official language on campus. We welcome students with diverse ethnicity and religious background. Modern dormitories are available for international students upon application.

3. Social Impact

Our faculty members are involved in health policy recommendations and social services. We take the university social responsibility to empower community residents and care for society at large with humanity.

Graduate Institute of Early Intervention

The uniqueness of the institute is that backed by the extensive resources of the Chang Gung University and Chang Gung Memorial Hospital systems, the institute leverages its expertise in combining medical care and education and facilitates the development of innovative research leadership.

Our faculty covers medical and education-related fields, specializing in pediatric rehabilitation, innovative early intervention, precision medicine, assistive technology, early childhood special education, early childhood literature, etc. Our goal is to nurture graduates possessing early intervention proficiency in both medical and educational fields and to meet the needs of families with disabilities and national policies for early intervention professionals.

The institute recruits students with diverse backgrounds in rehabilitation, medical care, education, psychology, social work, and related fields to early intervention. Through complete professional learning and teaming practice, we aim to cultivate the high-quality interdisciplinary clinical practice and research talents for early intervention.

Graduate Institute of Electro-Optical Engineering

The Graduate Institute of Electro-Optical Engineering (GIEOE) at Chang Gung University (CGU) invites international applications for full-time master students. The curriculum and research disciplines are currently planned as the followings:

- (A) Optoelectronic Semiconductors
- (B) Optoelectronic system design and displays
- (C) Biophotonics

Close cooperation with industrial companies can help students work and familiar with industrial trends. The extra stipend of research assistant can be provided by professors under research and industrial projects. International cooperation, publishing journal and conference paper are encouraged for all students with extra financial supports. A well training in theoretical knowledge, experimental skills, organization and reporting will be given to all students.

Graduate Institute of Biomedical Engineering

In the latest version of “Center for World University Rankings (CWUR)”, Chang Gung University ranked 6th in Taiwan and 579th worldwide.

In the 2021 Global Subject (Discipline) Ranking, announced by Shanghai Ranking Consultancy, the “biomedical engineering” subject of CGU ranked 3rd in Taiwan and 1st among all private universities in the country.

CGU has abundant and diverse resources available for foreign students. The institute organizes the programs such as intelligent tutoring, clinical practice, and industrial innovation to provide students with a platform for comprehensive medical device training.

Programs	Degree	Application Code	Session	Other required documents & Remarks

Department of Electrical Engineering

The department of electrical engineering, CGU, focuses on cultivating electrical /information specialized disciplines with academic/practical research, development capabilities, and has abundant research resources, equipment and teachers. Our department offers one of the nation's most comprehensive educational and research programs at both the undergraduate and graduate levels. We are also long-term working closely with Chang-Gung Memorial Hospital, the Formosa Plastics Group, and many other institutions to conduct work-study programs. The field of teaching and research focuses on artificial intelligence, 5G/6G communication, smart home, AI chip design, medical electronics, smart control, Internet of Things and other related fields of the electrical industry.

For the long-term development of EE, CGU, we will continue to improve our equipment, and instruction, while also encouraging our students to become socially responsible. This is how we plan to achieve our goal of becoming a first-class department in Taiwan as well as broadening our students perspectives on life.

Department of Electronic Engineering

The Department of Electronics Engineering has been founded for 25 years. Research and courses of the department focus on academic training and problem-solving skills in the fields of silicon, III-V semiconductors, wireless communications, medical electronics and electro optics. Qualified students can apply for internship opportunities.

Department of Computer Science and Information Engineering

1. The department of computer science and information engineering (CSIE) is a top department in the field of information engineering in Taiwan. Its specialization areas include computer science, computer hardware design, computer networks, mobile communications, data science, artificial intelligence, biomedical information and engineering, etc.
2. The educational goal of this department is "to cultivate excellent information engineering talents who combine theory and practice." Adhering to the school's educational philosophy of "cultivating professionals with rich academic theories and practical skills to improve the health of the people and promote industrial upgrading" and the school motto of "diligence and simplicity," it is consistent with the educational goal of the School of Engineering "to cultivate outstanding engineering talents combining theory and practice."
3. Our graduate alumni are distributed in worldwide famous IT companies including Google, Apple, Microsoft, Amazon, NVIDIA, Oracle, SONY, IBM, Intel, TSMC, MediaTek, CISCO, Qualcomm, Broadcom, etc.

Department of Mechanical Engineering

Founded in 1993, the department focuses on research and teaching in several engineering fields: Medical Engineering, Mechatronics and Robotics, Fluid Mechanics and Energy, Materials and Manufacturing, and Solid Mechanics.

The department actively conducts cooperative research projects with Chang Gung Hospital and Formosa Plastics Group. These projects help our students learn to solve real-world problems.

Master Program in Nano-Electronic Engineering and Design (NEED)

The NEED program is a dual master's degree program that students will obtain two master's degrees from Chang Gung University (CGU) and Singapore University of Design and Technology (SUTD) upon the successful completion of coursework and research. CGU is a private research-oriented university in Taiwan and SUTD is a joint venture between Singapore Government and Massachusetts Institute of Technology (MIT), USA. The program recruits 30 students worldwide each year and only 5 Taiwanese students are accepted among the 30. Hence, this is an English-taught and highly internationalized program.

The NEED program is an 18-month program that students take most of the courses in Taiwan in the first 9 months and do research in Singapore in the following 9 months. Students build up the fundamental and advanced knowledge of nano-electronics and semiconductor manufacturing during the coursework study in Taiwan. Afterwards, students conduct an industry-related research project in Singapore for practical training. The NEED program aims at training international and advanced project leaders in nano-electronics and semiconductor industry.

4.3 College of Management

Department of Health Care Management

Undergraduate program : Health care management is an applied science with multi-disciplinary nature, characterized by the combination of theory and practice. The undergraduate program is based on holistic education, including basic humanities and professional trainings. We emphasize learning from practicing. Potential students pursuing a career in health care management are encouraged to make decision with discretion if their capacity for vision, color-differentiating, hearing, language proficiency, physical or mental functions are limited.

Graduate program : The health care management master program is designed to train professionals with excellent ability in health care management and decision-making in an ever-evolving environment of bio-technology and health care. The program emphasizes learning from practicing by encouraging students to participate in academic projects and internship in domestic or international health care-related institutions. Student exchange programs are available with Japanese, French, and American universities. Potential students pursuing a career in health care management are encouraged to make decision with discretion if their capacity for vision, color-differentiating, hearing, language proficiency, physical or mental functions are limited

Department of Industrial Design

The department aims to cultivate design professionals with cross-disciplinary innovation and a global vision. The department provides design theory and technique/skill courses and trains students in design practice through core courses. The curriculum design integrates professional knowledge such as product design and digital interactive media design, emphasizes design innovation, and develops in the two primary directions of "medical design" and "cross-disciplinary innovation and entrepreneurship."

Emphasize the integration of theory and practice, implement students' professional design ability, and cultivate students to become professional designers with humanistic care, cross-disciplinary innovation, application of advanced technology, global vision, and artistic accomplishment.

Design technique/skill and practice courses require a lot of practical operations, such as design thinking, hand-drawing, computer graphics, sketching and model making, etc.

Department of Information Management

The department is committed to cultivating information management professionals.

Our commitments are realized through five focuses implemented in programs and course modules: Information System Development, Data Analytics in Business and Healthcare, Information Security Management, IT Project Management, and Banking IS Development.

Our students will be able to integrate information and management theories and possess capabilities of information system development and data analytics in the fields of finance, health care, business, manufacturing, and services.

School of Business (MBA)

1. This program is taught in English.

2. Professionals of all fields are welcome. It is suitable for those who have an undergraduate degree in literature, law, business, science, engineering, medicine, or agriculture to increase their management expertise. In this program, you will gain knowledge of business management, data analysis, problem defining, and problem-solving.
3. Professionals of all fields are welcome.
4. Study with top students from around the world.
5. Offer opportunities of one-year paid internship positions in USA.
6. Offer exchange programs in Japan, France, and Thailand.
7. Association to Advance Collegiate Schools of Business (AACSB) accredited.

4.4 College of Intelligent Computing

Department of Artificial Intelligence

The College of Intelligent Computing (CoIC), established in 2022, is the first college-level academic institution in Taiwan devoted to the science and education of artificial intelligence technology. CoIC offers comprehensive higher education degrees from undergraduate, master, to PhD. Its mission is to train top AI professionals fit for the future.

The Department of Artificial Intelligence boasts first-class faculty members from Taiwan and abroad. Using both local and remote teaching and research collaboration, and English as the main language, we aim to build a global learning environment for our students. Connected by our network of global affiliated research faculty, students have abundant opportunities for international exchange including visits, study exchange, and joint research. We aim to provide an immersive learning experience to allow students to grow and to be capable of lifelong learning. Students will not only be equipped with fundamental AI knowledge, but will also acquire practical experience in AI development and application through joint projects with the industry and healthcare sector.

In addition, CGU's AI Research Center owns the most advanced AI server hardware, IoT equipment, and multi-field research projects, providing students with a modern industry-scale implementation environment to prepare them to be the next-generation AI technology leaders.
