Why M.U.S.T.?

Founded in 2000, the University rapidly developed and has become the largest multi-disciplinary university in Macao with over 21,000 enrolled students. The University has the authority to confer academic degrees at all three levels: Doctor, Master and Bachelor, offering various degree programs to cater to the needs of students. M.U.S.T. is ranked Top 300 Universities in the “World University Rankings 2024”, 35th in the “Asia University Rankings 2023”, and 26th in the “Young University Rankings 2023”, released by *Times Higher Education (THE)*.

Currently, M.U.S.T. owns several state-level research platforms: the State Key Laboratory of Quality Research in Chinese Medicine, the State Key Laboratory of Lunar and Planetary Sciences, the National Observation and Research Station of Coastal Ecological Environments in Macao and the Key Laboratory of River Basin Digital Twinning of Ministry of Water Resources. The University also established Macao’s first Laboratory named after a Nobel Prize Winner, “Dr. Neher’s Biophysics Laboratory for Innovative Drug Discovery”; Additionally, more than 20 prominent institutes and research centers have been established, to conduct strategically interdisciplinary and cutting-edge research in multiple fields.

The University has international and well-experienced academicians/fellows, offering a wide range of degree programs which fits the need of the society. With the international teaching approach, the program structure and course curricular align closely with the international standards of the corresponding program, aiming to nurture bilingual ability of the students with proficiency of both Chinese and English with the goal of nourishing professionals of the industry and provide an all-round knowledge for the students with their variety of development in the future. Besides, the University offers a wide range of local and overseas internship programs to students, with the purpose to broaden their horizon and enhance competitiveness in the workplace with focus to nurture the integrated ability of students with their whole-person development to enhance their competitiveness. Our undergraduates will go to prestigious universities around the world to continue their studies, and some students are admitted to top-ranking universities in the world. In terms of employment, the university maintains close ties with government departments, public and private organizations, and well-known enterprises to establish friendly relationships and provide students with more employment and internship opportunities.
