# FOREWORD FROM OUR RECTOR

Universitas Airlangga (UNAIR) is committed to making efforts and breakthroughs to be a world-class university. All members of its academic community constantly strive towards quality improvements and an excellent academic climate. Various institutional policies are introduced to encourage academics to make greater contributions to the world's civilization.

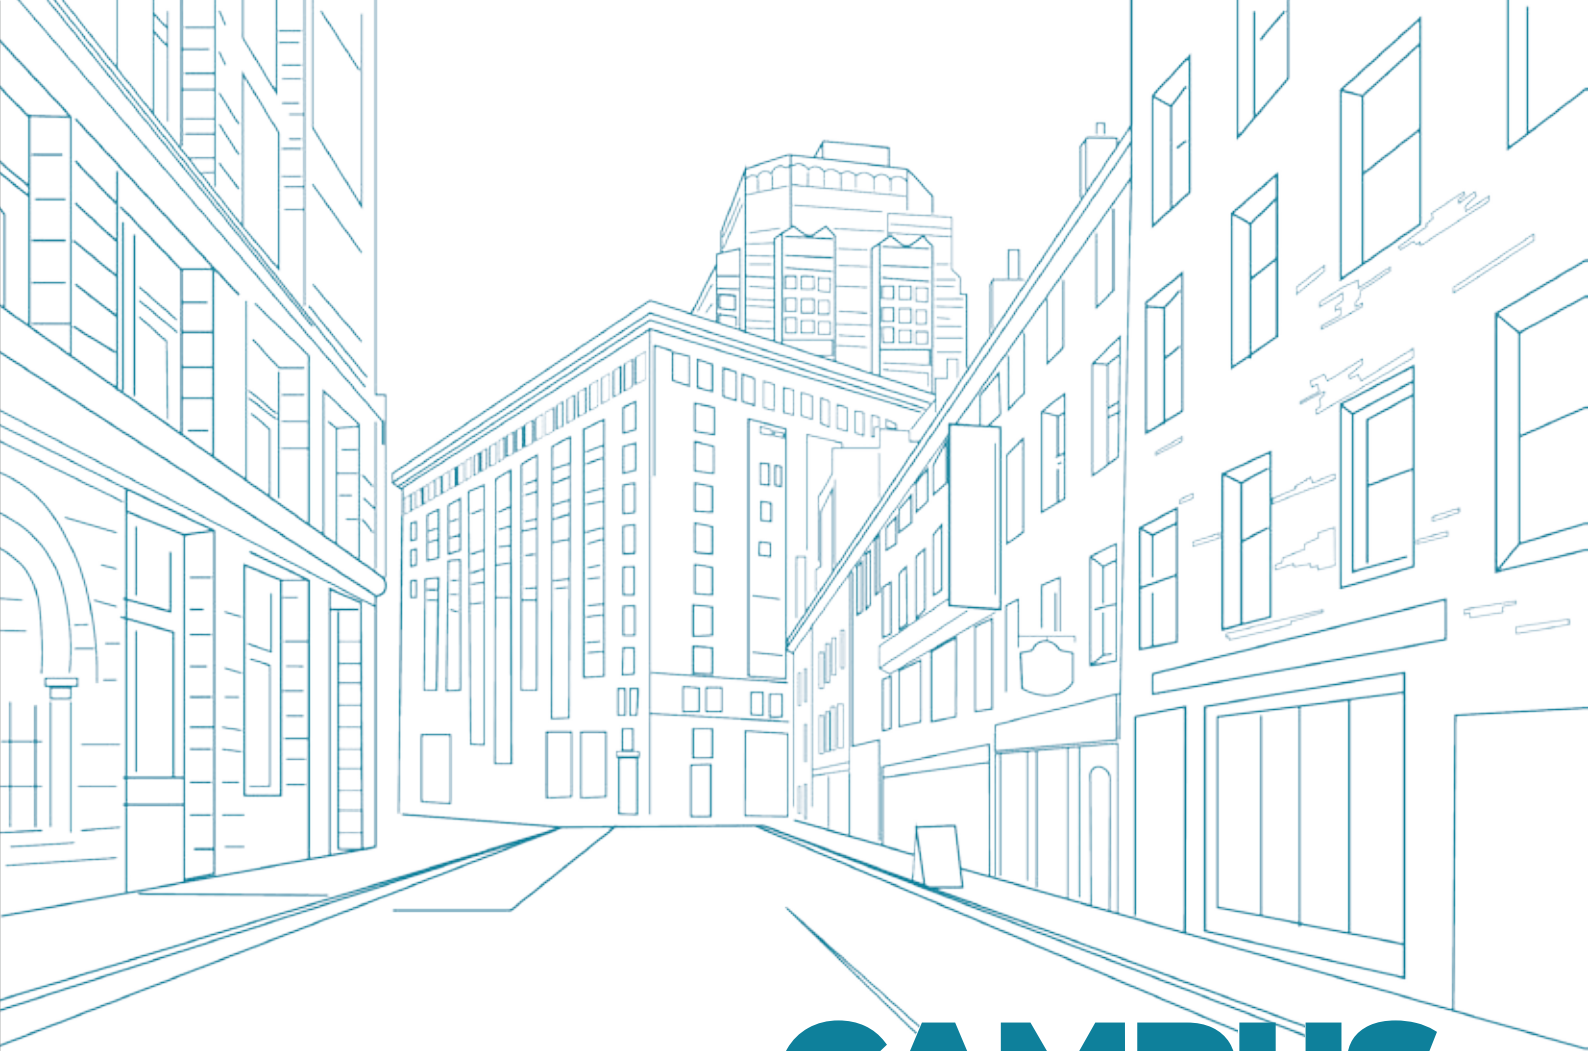

The results of those efforts and policies can be seen from the extensive network of international partnerships. Universitas Airlangga has collaborated with hundreds of institutions from various regions of the world. The university also conducts various collaborative programs such as joint research and exchange programs for students, faculty members, and administrative staff. UNAIR is a growing global community with expansive international engagements carried out continuously.

As one of the best Indonesian universities, Universitas Airlangga has a great responsibility to take a more significant role in global development. This responsibility is shown from the efforts to enhance the quality of education towards global standards, improve the research and innovation performance, and conduct services for the wider community.

Our university is also committed to allowing students to gain the latest global insights and offering important insights to preserve the local wisdom and values of Indonesia. We believe the locals' hospitality, values, and heritages make this nation unique. They can be essential points to achieve global success.

Our achieved goal to be among the Top 500 World Class Universities will push us to accelerate even faster in various fields of study. Hopefully, this 2022 Prospectus can show our determination to be a top higher education institution globally, advance towards a just and civilized global civilization through our values and key concept of Excellence with Morality, SMART, and HEBAT.

# CAMPUS EXPERIENCE

**“Excellence with Morality”** is the core value, paradigm, and identity of Universitas Airlangga's academic community integrated into the best performance in science and technology development oriented to morality and religious values.

It is operationalized in four ways in BEST acronym: Based on morality; Excellence in academic, research, community services and holding university; Strong academic culture; and Target-oriented.

Being based on morality affirms that all activities carried out by UNAIR academics must be based on religious morality. Excellence in academic, research, and community services shows that higher education Tri Dharma activities and business units owned by UNAIR must have excellence. Strong academic culture refers to an organizational culture that reflects the attitude and actions of UNAIR academics. Target-oriented means that all academic community's activities are measurable and become the basis for implementing performance-based management.

## SMART

*SMART is an acronym of university key concepts; Sustainable education for all, Meaningful research and community services, Advancing innovation, enterprising, and industry linkages, Responsive and lean management, and Topping up tangible and intangible resources utilization.*

The first concept is **Sustainable Education for All**. It is formulated to improve the relevance of graduates at a global level through added value reinforcement and educational sustainability. **Meaningful Research and Community Services refer** to a comprehensive concept of Tri Dharma's implementation leading to more meaningful and significant impacts of research and community services towards SDGs (Sustainable Development Goals). **Advancing Innovation, Enterprising, and Industry Linkages** are devised to develop innovations, industrial collaborations, and industrial productions. It encourages sustainable research intensification through hexa-helix collaboration. The next key concept, **Responsive and Lean Management**, aims to achieve effective, efficient, responsive, and accountable managerial performance supported by integrated information systems through business process digitalization. The final concept, **Topping Up Tangible and Intangible Resources Utilization**, is formulated to optimize the human capital, organizational capital, and information capital to achieve institutional independence and global recognition.

## HEBAT

*HEBAT is an acronym of ideal characteristics expected from students of Universitas Airlangga. It is expected to inspire students, especially freshmen, and form their characters. H is for Humble-Honest; E is for Excellent; B is for Brave; A is for Agile; and T is for Transcendent.*

All students of UNAIR are expected to be humble and honest. They should have humility for their knowledge and achievements. They are obliged to always be honest, to tell the truth with sincerity. The second letter, E, is for Excellent. It means UNAIR students must have the quality of being outstanding in their respective fields. The next letter is for Brave. Every student is expected to have the bravery to contribute in the community. Students must be brave enough to make the best policy and decision in solving problems in the community.

Agility is also expected from the students. They must have strong awareness and be able to respond to any problems found in their community. The last letter is for Transcendent. Every student's deed must be done without forgetting the existence of God. It also means a quality surpassing the ordinary or expecting students to think beyond in making contributions in the community.

# CITY OF SURABAYA

In its early history, Surabaya was once called Ujung Galuh. It was a major trading port city located at the estuary of Brantas River, by the Java Sea and Madura Strait. Surabaya has borne witness to the Age of Kingdoms, Colonial Era, and the Independence Era.

Surabaya is growing and developing into the second biggest metropolis in Indonesia. It becomes a modern industrial city, a center of trade and cultures with excellent education quality.

As one of the higher education institutions established in Surabaya, Universitas Airlangga has played a greater role in developing the city and inspiring the world. It has made contributions in various fields, from health, economic, social, political to humanities.

## **Hub City**

Surabaya is almost located in the center of Indonesia, and it makes Surabaya potential as the connecting city. Its airport, railway stations, and seaport connect global communities to interesting tourist destinations such as Mount Bromo in Probolinggo, The Red Island and Blue Fire crater of Ijen in Banyuwangi, and other natural beauties in Malang and Batu.

## **Tourism and Culinary Attractions Downtown**

Even as a hub city, Surabaya has interesting tourist destinations downtown. There is the Submarine Museum, House of Sampoerna, Cheng Hoo Mosque, Surabaya Zoo, Surabaya Night Carnival, and lots of shopping centers to go to before heading for the natural tourism spots in rural areas.

Furthermore, tourists may enjoy diverse choices of culinary delights in restaurants, diners, or street vendors. There are plenty of spicy traditional and local dishes to try, from rawon, rujak cingur, to tahu campur.

# INDONESIA, EMERALD OF THE EQUATOR

Indonesia is the largest archipelagic country in the world with over 17 thousand islands lying along the equator from Sabang to Merauke. The archipelago's lush tropical rainforest radiates a beautiful green color that many even deem Indonesia as the Emerald of The Equator.

Indonesia lies in a strategic location, between Asia and Australia and between the Indian Ocean and the Pacific Ocean. Its archipelago has been an important region for trade since the 7th century, and various world civilizations have influenced its history.

Furthermore, its tropical climate makes Indonesia popular among tourists all year round. However, you get the most of Indonesia during its dry season from April to October. It offers various natural and cultural attractions. The former can be seen from beautiful beaches, lakes, mountains, valleys, and rainforests from Sabang to Merauke.

Bali, Bromo, Lombok, Raja Ampat, Lake Toba, Dieng, and the Land of Toraja are only a few spots of Indonesian natural wonders. A rich cultural heritage that reflects Indonesia's dynamic history and ethnic diversity also complements the beauty of a country with one of the longest coastlines in the world.

Not only famous for its natural beauties, but Indonesia also has great cultural assets from hundreds of distinct native ethnic and linguistic groups, with different religions and traditions. "Bhinneka Tunggal Ika," which means "Unity in Diversity," is the value upheld by Indonesians. More than 270 million people have lived in harmony and peace, showing great tolerance amidst the diversity.

With its diversity, Surabaya City also takes part in achieving Indonesian advanced and dignified civilization. It has become an essential part of the nation through its economic, educational, and cultural developments.

This essential part of Surabaya cannot be separated from the role of higher education institutions located in the city. Universitas Airlangga, one of Indonesia's oldest institutions, has contributed to creating an advanced civilization in Surabaya and Indonesia through its innovations.

# FACULTY OF MEDICINE

Faculty of Medicine (FK) UNAIR has given a significant contribution to the country. Reliable doctors are produced by the faculty to serve the community. Not only at national level, but they have also shown excellent performances at international level, including in the education and research field.

Furthermore, new discoveries in the realm of medicine are also introduced by the academic community.

The facilities provided by the faculty are convention hall (GraBIK-IPTEKDOK Building); auditorium; medic training room; computer and English course rooms; and problem based learning discussion room. Other excellent facilities include Genetics Lab, Surgical Anatomy Lab and Integrated Lab.

\*(Accreditation by National Accreditation Agency for Higher Education)

UNAIR has worked with dozens of institutions from various continents. The latest established partnerships were with Kobe University, Groningen University, Oita University, Taiwan Medical University, Adelaide University, Mahidol University, and Manchester University. The partnerships are in the field of research and publications, staff and student outbound programs, as well as a double degree program with the Medical Science Doctoral Program.

Amid the pandemic, Faculty of Medicine UNAIR actively involved in the Covid-19 handling through its lecturers and students. For example, in some vaccination programs held by UNAIR with the Health Office and Ksatria Airlangga Floating Hospital (RSTKA); Marco-19 program with RSTKA in Madurese Isles, Covid-19 patients' handling in Indrapura Field Hospital. Ksatria Airlangga Floating Hospital (RSTKA) is always ready to provide disaster support including for what happened in East Nusa Tenggara, Mamuju, Minahasa.

# FACULTY OF DENTAL MEDICINE

Faculty of Dental Medicine (FKG) Universitas Airlangga is the oldest faculty of dental medicine in Indonesia. From 1928 to 1942, FKG was called School Tot Opleiding van Indische Tandartsen (STOVIT). Then it was changed to Ika Daigaku Shika until 1945, Tandheelkundig Instituut until 1947, Universiteit Tandheelkundig Instituut until 1948, and Institute of Dental Medicine until 1953. Finally, in 1954 the name officially became FKG UNAIR.

The Faculty of Dental Medicine contributes to the fields of education, research, and community service for the nation. FKG UNAIR graduates are spread across various regions in Indonesia to address dental and oral health issues in the community.

tThe faculty also provides several facilities such as laboratories, libraries, sterilization rooms, research centers, and Stovit Cafeteria.

Various facilities during the pandemic to support the learning process include hybrid study rooms, simulator rooms, studio rooms, clinical research laboratories, computer-based test (CBT) room, objective structured clinical examination (OSCE) room, research center, e-libraries, and Covid-19 task force.

FKG UNAIR has collaborated with both local and international partners. The faculty has established cooperation with the School of Dental Medicine, OSAKA University-Japan; Faculty of Dental Medicine, MAHSA University-Malaysia; and Faculty of Dental Medicine, NIIGATA University-Japan. The collaborations between these parties are in the form of student and academic exchanges.

Moreover, there are numerous programs for international students. They can participate in joint degrees with Hiroshima University and summer programs for two weeks, one month, and six months. The details of these programs are available in the International Undergraduate Program Universitas Airlangga (IUP UNAIR).

[fh.unair.ac.id](http://fh.unair.ac.id)

## FACULTY OF LAW

Universitas Airlangga was inaugurated in 1954 by the first President of Indonesia, Ir. Soekarno, with Faculty of Medicine, Faculty of Dentistry, and Faculty of Law as the first three faculties. There are numerous law experts from Universitas Airlangga, one of which is Prof. Mr. A.G. Pringgodigdo (Former State Secretary in President Soekarno's cabinet and also one of the founders of Faculty of Law Universitas Airlangga). Having a great reputation in legal education, the faculty has been entrusted with responsibilities by the National Education Department since 1970 to mentor law faculty of other universities in East Indonesia.

The Faculty of Law (FH) has a vision to become an independent and innovative leading faculty in Asia and a pioneer of law faculty that produces competent graduates as professional jurists without neglecting morality. In order to achieve the vision, Faculty of Law Universitas Airlangga recognizes that legal education is not only limited to academics but also skills in practicing law. Therefore, the curriculum comprises both theories and practices to prepare the students for their future career. Furthermore, the faculty has been preparing the students to face future law regarding globalization and trying to develop legal education systems through various training and legal research conducted by the academic staff.

FH UNAIR has various supporting units such as Moot Court Rooms, Law Firm Simulation Office, ADR Simulation Office, Law Library, Law Book Store, ALEC, Legal Document Making Lab, and Podcast Studio.

International partnership collaborations include Faculty of Law, Universiti Teknologi MARA, Malaysia regarding student and staff exchanges, joint publications, joint research, and joint conferences; the Faculty of Law, Maastricht University, the Netherlands regarding the Orange Knowledge Program –Legal Education, Ethics and Professionalism (OKP-LEAP) 2019-2021, double degrees, and staff exchanges; Leiden Law School, Leiden University, the Netherlands on student exchanges; the Faculty of Law and Administration, University of Gdansk, Poland on staff exchanges; and the School of Law, Cebu University on staff exchanges.

During the Covid-19 pandemic, the Faculty of Law has conducted several activities such as the Alumni Donation Movement for 3 Hospitals, 1000 masks donation, IKA FH UNAIR JABODETABEK donation, and various kinds of provocative contributions to policies for handling the pandemic through webinars, research and publications, student activities, and community service.

Through the Consultation and Legal Aid Unit (UKBH), FH UNAIR is ready to provide legal assistance, especially to orphans who have lost their parents due to Covid-19. The legal assistance includes services in managing guardianship letters and other legal documents.

**THROUGH THE CONSULTATION AND LEGAL AID UNIT (UKBH), FH UNAIR IS READY TO PROVIDE LEGAL ASSISTANCE, ESPECIALLY TO ORPHANS WHO HAVE LOST THEIR PARENTS DUE TO COVID-19.**

The faculty is well-known for its excellence in research with several research groups, including in the fields of Pharmaceutical Material Engineering and Processing, Pharmaceutical Analysis, NPD3, INACORE, Drug Development, and Clinical Pharmacy. The research is supported by adequate facilities, including Clinical Pharmacy Lab, Formulation Prescription Lab, Pharmaceutical Technology Lab, Synthetic Pharmacy Lab, Medicinal Chemistry Lab, MMI, Biotechnology Lab, Photochemistry Lab, Botany Lab, and Dry Laboratory (CBT & OSCE Center).

The faculty also has dozens of innovative products, which the community can utilize. Some of them are healthy drinks from green tea extract called Meditea, male birth control pills in the form of Gendarussa Extract Capsules, cholesterol-lowering herbal medicine called Pro-Slimpid Capsules, anti-cancer herbal medicine called Pro-Ca Capsules, anti-acne gel called Muntingia Gel, and anti-aging cream called You-Ka Cream. The latest products are Piperona hand sanitizer, Allset Hand Sanitizer, and Allset Surface Sanitizer disinfectant. They are the innovations of academics during the Covid-19 pandemic.

FF UNAIR also continues to collaborate with universities and institutions both at national and international levels. Most recently, cooperation has been established with University Malaya in terms of an academic exchange program; the Faculty of Pharmaceutical Sciences Ubon Ratchathani University, the Kingdom Of Thailand in terms of academic cooperation; and the Faculty of Pharmacy, Srinakharinwirot University, Thailand, in terms of academic collaboration.

Moreover, FF UNAIR also has a double degree program with Management & Science University Malaysia and an international student program through the International Undergraduate Program Faculty of Pharmacy UNAIR.

Several facilities owned by FKH are 14 lecture rooms with a capacity of 50-200 people and ten small lecture rooms equipped with AC, LCD, Computer/Laptop, WIFI, White/Blackboard, microphone, and student computer center equipped with internet facilities. Moreover, facilities to support research development include GCMS (Gas Chromatography Mass Spectrometry), microscopes, inverted microscopes, dissecting microscopes, fluorescence microscope, PCR equipment, electrophoresis apparatus, SDS PAGE apparatus, surgery equipment, anaesthesia apparatus, Doppler apparatus, Penetrometry, ELISA apparatus, Laminar Flow Spectrophotometry, Bomb calorimetry, High centrifuge with refrigerator, waterbath, Microhematocrit centrifuge & Reader, Micromanipulator, USG, X-ray, inpatient rooms, and experimental animal cages.

FKH UNAIR has an Animal Teaching Hospital (RSHP), Teaching Farm, and Veterinary Testing and Feed Analysis Unit with KAN accreditation. The faculty also has other facilities in the Kedamean Gresik area and Educational Animal Park or Teaching Farm. Several services are available such as animal feed laboratory, bacteriology and mycology laboratory, virology laboratory, veterinary pathology laboratory, clinical laboratory, veterinary parasitology laboratory, and veterinary public health laboratory.

Amid the Covid-19 pandemic, FKH UNAIR has been continuously playing a role in helping the wider community through research and community service activities such as empowering Jambangan Surabaya Village's people to prevent the spread of Covid-19; On-Line Training on Making HandSanitizer Devices Made of Non-Alcohol for Fostered Youth in Bojonegoro, Nganjuk, Probolinggo, Gresik, and Lamongan Regencies; providing health booths to support the movement against Covid-19 programs. Moreover, FKH staff are involved in Merah Putih Vaccines research development.

Faculty of Veterinary Medicine Universitas Airlangga has cooperation on the national and international levels in education, research, publication and community service. National cooperation with various government and private institutions in the veterinary field, as well as between domestic and abroad universities. Internationalization and collaboration with various partner universities abroad, including: Thailand (Chulalongkorn University, Kasetsart University, Chiang Mai University, Khon Kaen University), Philippines (Tarlac Agriculture University, University of The Philippines Los Banos), Myanmar (University Veterinary Science), Vietnam (Hanoi Agriculture University), Malaysia (University Putra Malaysia, University Malaysia Kelantan), Korea (Seoul National University), Japan (Osaka Prefecture University, Osaka University, Kobe University, Yamaguchi University, Kagoshima University, Miyazaki University, Tottori University, Gifu University, Hiroshima University), Taiwan (National Pingtung University Science and Technology), France (Ecole Nationale Vétérinaire, Agroalimentaire Et De L'alimentation De Nantes), and Australia (University of Western Australia).

[fisip.unair.ac.id](http://fisip.unair.ac.id)

## FACULTY OF SOCIAL AND POLITICAL SCIENCES

The Faculty of Social and Political Sciences (FISIP) Universitas Airlangga was established on December 23, 1977. The Faculty of Social Sciences (FIS), the former name of FISIP, marked its establishment with Sociology as the first major. After 44 years, FISIP has grown into seven undergraduate programs, five postgraduate programs, and one doctoral program. When it was first founded, seven lecturers of the faculty provided a strong social science education. A strong foundation of idealism and a strong sense of solidarity have led FISIP UNAIR to become more than just an educational institution. FISIP has become an alternative discourse that offers various things, such as renewal of idealism, determination, truth, critical attitudes, and beliefs.

Amid today's unlimited flow of information, including the domination of hegemonic interests and power, FISIP UNAIR continues to grow as itself, against the tide, even though it is not done openly. The development of FISIP has exceeded the expectations of its founders. Many FISIP graduates have strategic careers in various fields, from social to political sectors. The views of the professors and lecturers are also often cited by the national media in responding to the latest social phenomena. In mass media, FISIP alumni are not only reliable reporters, but also respected senior editors and even Chief Editors. In bureaucracy, there is a great possibility that pioneers, driving force of various planning activities, are also FISIP alumni. For example, Soekarwo or Pakde Karwo is one of the most well-known FISIP alumni in East Java. Apart from being the governor of East Java, Pakde Karwo has succeeded in leading East Java as a province with the best bureaucracy for seven consecutive years. In addition, FISIP alumni are often involved in guest lecture activities.

Social Studies (A)

To support academic activities, FISIP provides various facilities. These facilities include a reading room, a Museum and Center for Ethnographic Studies, an Integrated Communication Laboratory, a Mini Theater, and a Cakra Laboratory (simulation laboratory).

In handling the pandemic, FISIP contributes to providing cash assistance for teaching staff and lecturers who are self-isolating or under medical treatment and students who are experiencing economic difficulties. In addition, FISIP also provides information and services about the pandemic on its website. The provision aims to help UNAIR academic community and the general public find information on how to handle Covid-19 situations quickly.

At the international level, this year FISIP collaborates with Monash University by holding guest lectures in ten different fields of scientific study. Among them are the Film Studies Lecture Series, Monash University Lecture Series, Creative Industries Lecture Series, Joint Class with UKM and ECU, et cetera. FISIP also opens new international student admissions through the Developing Countries Partnership (KNB) scholarship program, Airlangga Development Scholarship (ADS), AMERTA, and a summer course by the Communication Student Association.

**THE DEVELOPMENT OF FISIP HAS EXCEEDED THE EXPECTATIONS OF ITS FOUNDERS.**

## FACULTY OF **SCIENCE AND TECHNOLOGY**

In 1970-1979 Institute of Basic Science and Mathematics (Basic Natural Science / BNS) was founded with in Faculty of Medicine management. In 1982, Faculty of Mathematics and Natural Sciences (MIPA) was established with 4 departments, there are Biology, Physics, Chemistry, and Mathematics. In 2008 Faculty of Mathematics and Natural Sciences (MIPA) changed into Faculty of Science and Technology (FST), in line with the new established study programs, there are Information Systems, Biomedical Engineering, and Environmental Science and Technology undergraduate study programs and In 2011 statistic study program was founded. In 2017 study program of Environmental Science and Technology became Environmental Engineering.

In handling the Covid-19 pandemic, FST makes a real contribution to society in various research and product innovations. For instance, FST has made several research innovations such as vaccine for covid-19, new development drugs for covid-19, covid kit diagnostic RNA based, anolyte (environmental friendly disinfectant), and Smart Washing Hand Machine (SWAM). It is not only in research, but also FST already conducted some community services regarding to prevent covid-19 in communities both national and international scale.

Chemistry (A)  
Biomedical Engineering (B)

## **Doctoral Degree :**

Mathematics and Natural Sciences (B)

To support the learning process, FST provides various facilities such as a mathematics laboratory, a biology laboratory, a chemistry laboratory, a physics laboratory, workshop, a faculty reading room, a large green yard, air-conditioned lecture rooms, and UV rays.

FST consistently promotes global collaboration through research and innovation. With the solid groundwork in science and technology, FST have successfully translated our novel laboratory discoveries and research work into viable products and services. Comprehensive collaboration with academic, government, industry, and other stakeholders helps us to act quicker, work smarter, and achieve more.

Some of our global collaborators and partners including universities, government institution, and industries. There are: Universities: Aston university (UK), Kassel university (Germany), University of Groningen (Netherlands), Swinburne University of Technology, Chulalongkorn University (Thailand), Korea University (South Korea), Osaka University (Japan), National Cheng Kung University (Taiwan), University of Malaya and Universiti Tun Hussein Onn (Malaysia), University of Karachi (Pakistan), TU Delft (Netherland), and many more.

Government Institutions: Jawa Timur Provincial Government, Maluku Provincial Government, Local government of Surabaya, and many more.

Industry: PT Pertamina, PT. Intiland Tbk., PT. Pupuk Kaltim Bontang, PT. Petrosida, and many more.

## FACULTY OF PUBLIC HEALTH

The Faculty of Public Health (FKM) Universitas Airlangga (UNAIR) is one of the pioneers of the Faculty of Public Health in Indonesia. This faculty aims to produce proactive, innovative, and professional graduates in Public Health Sciences. The students and lecturers are expected to produce research that supports the development of health science and technology for community service.

During the Covid-19 pandemic, FKM UNAIR has contributed to the community at the regional and national levels. FKM lecturers have been involved as consultants for the Covid-19 handling in the East Java Provincial Government and National level. In addition, the lecturers have also conducted epidemiological studies and Covid-19 prevention in several areas in Indonesia, particularly in East Java, including Sidoarjo, Pasuruan, Magetan, Bangkalan, and other areas.

In addition, the Faculty of Public Health assists the government in efforts to reduce child stunting and also maternal and child mortality Indonesia in several areas in East Java.

## **Doctoral Degree :**

Health Sciences (A)

FKM UNAIR provides six laboratories, computer laboratories, epidemiology laboratory, health nutrition laboratory, Audio Visual Aid (AVA) laboratory, environmental health laboratory, and occupational health and safety laboratory to support the learning process. Furthermore, FKM UNAIR has also established both national and international partnerships. They include collaboration with the Ministry of Health in stunting prevention, assistance to the health program of the Health Office of East Lombok and Bima NTB, cooperation as a consultant in several hospitals in East Java, collaboration with Geliat Airlangga and UNICEF, and grants from several institutions abroad such as Centers for Disease Control (CDC), World Health Organization (WHO), UNICEF, SATU Joint Research Scheme (JRS), and TIPH (This Is Public Health), ASPPH (Association of Schools and Programs of Public Health), WHO SEARO, Think Well and etc.

The ongoing international programs include the double degree program of Occupational Health and Safety Master's Program by FKM UNAIR and Griffith University Australia and Public Health Airlangga University Summer School (PHAUSS). Public Health Airlangga University Summer School (PHAUSS) is an international program organized by FKM UNAIR to increase interaction with the global academic community. PHAUSS provides students, professionals, researchers, proprietaries, and policymakers opportunities to learn in short non-regular class programs conducted outside the regular semester schedule. Through various course topics provided by several departments and divisions at FKM UNAIR, participants of the PHAUSS program will interact with instructors or lecturers who have great experience and expertise in research and community service in national and international areas. Furthermore, to achieve international recognition and compete in the international area, FKM has gained international accreditation. After a year of the curriculum validation process, FKM UNAIR is listed as the first campus in Southeast Asia to achieve international accreditation from the Agency for Public Health Education Accreditation (APHEA).

**TO ACHIEVE INTERNATIONAL RECOGNITION AND COMPETE IN THE INTERNATIONAL AREA, FKM HAS GAINED INTERNATIONAL ACCREDITATION**

## FACULTY OF PSYCHOLOGY

The Faculty of Psychology originated from an exploratory study on September 25, 1981. In 1983, the Psychology Program was established under the Faculty of Social and Political Sciences management and developed as a separate department in 1991. Then, in 1993, the Faculty of Psychology was officially established. The opening of this faculty coincided with the establishment of the Faculty of Public Health (FKM) Universitas Airlangga (UNAIR). The Faculty of Psychology Universitas Airlangga has proven to be one of the pioneers in the development of psychology-based science and technology in accordance with religious morality in Indonesia. As a higher education institution, the Faculty of Psychology has been improving its quality to meet the demands of a continuously changing era. The development of modern, independent, and innovative education always improves the quality and ability to compete at the national and international levels.

In handling the pandemic, the Faculty of Psychology UNAIR has made contributions for UNAIR academic community and the general public. For instance, psychological assistance has been provided in the form of free counseling services for the community, especially the Universitas Airlangga Academic Community, who are affected by Covid-19 and need psychological, educational, and consultation support to go through the pandemic. In addition, the faculty also provides mental and physical health education to working mothers amid the pandemic through Instagram Live. It is also actively involved with HIMPSI (Indonesian Psychological Association) and the Presidential Staff Office in handling the Covid-19 pandemic through Layanan Sejiwa (Mental Health Service) 119, ext 8. This service covers consultation, education, and psychological assistance for Indonesian citizens.

Professional Psychology (A)

Applied Psychology (B)

## **Doctoral Degree :**

Psychology (A)

The faculty provide several facilities to support learning and science advancement of Psychology. The buildings comply with health protocols, good learning atmospheres, and adaptive services (Psyche E-Learning System). In addition, Mini Studio is provided for the production of learning content. Other services cover integrated student services and Online TKDA (Basic Academic Competency Test) services. Furthermore, the Applied Psychology Unit includes the Psychological Service Unit, Laboratory of Study and Development of Applied Psychology (LP3T), Centre of Applied Educational Psychology, Crisis Centre and Community Development (PKPK), and Preschool Kindergarten Anak Ceria.

The Faculty of Psychology Universitas Airlangga has established international partnerships with Monash University, Universiti Utara Malaysia, Lomonosov Moscow State University Russia, UNSW Australia, Management and Science University Malaysia, and Heinrich-Heine-Universität Düsseldorf Germany. In addition, another collaboration is also established between WUACD (World University Association for Community Development) UNAIR and the Psychology Talent Finding Program for Children with Special Needs throughout Indonesia.

Currently, UNAIR Faculty of Psychology holds international programs, including the International Undergraduate Program in Psychology, Double Degree Program / 2+2 Articulation Program with Queensland University of Technology, and Student Exchange with Universiti Utara Malaysia.

## FACULTY OF HUMANITIES

Established in 1954, Universitas Airlangga initially had five faculties, including a Faculty of Letters located in Denpasar, Bali. Several years later, in 1962, the faculty declared its separation from Universitas Airlangga Surabaya. However, the determination to have a Faculty of Letters at Universitas Airlangga was still strong among some academicians. The formation of the Faculty of Letters Establishment Assessment Committee resulted in the proposal to open two programs, English Literature and Indonesian Literature, under the Faculty of Social and Political Sciences. The Indonesian Language and Literature Program and the English Language and Literature Program were officially established on November 13, 1989. Meanwhile, the History Program was officially opened on March 13, 1998. Finally, on December 2, 1998, the Faculty of Letters was officially established.

However, there were a high number of students using Cultural Studies as their undergraduate thesis theme. In addition, the core of Literature and Historical studies tended to study literature and cultural studies. Therefore, the Faculty of Letters changed its name to the Faculty of Humanities (FIB) Universitas Airlangga BHMN (State-Owned Legal Entities) under the Decree of Rector No. 3292/J03/OT/2008 dated April 10, 2008. FIB has a vision to become an independent, innovative, and leading faculty at the national and international levels and be a pioneer in the development of humanity and art studies based on religious morality. To realize this vision, three missions are implemented, one of which is to organize academic education based on modern learning technology. During the pandemic, the Faculty of Humanities has been implementing online learning activities through the e-learning system. This facility is located on an integrated platform capable of recording lectures and online activities with the zoom application. The equipment includes two sets of cameras integrated with zoom and green screen technology.

# PROGRAMS

## Bachelor's Degree :

Indonesian Language and Literature (A)  
English Language and Literature (A)  
History (A)  
Japanese Studies (A)

## Master's Degree :

Linguistics (Excellent)  
Literary and Cultural Studies (B)

Learning in the Faculty of Humanities is supported with various facilities to improve students' academic and non-academic abilities. Among them are a reading room, multi-purpose hall, Ferdinand de Saussure laboratory, Noam Chomsky laboratory, A Teeuw laboratory, Poerwodarminto laboratory, history laboratory, computer laboratory, Kawabata Yasunari laboratory, Philology laboratory, gamelan (traditional Javanese music) room, music room, BIPA (Indonesian Language Program for Foreigners) room, archive room, Museum of History and Culture, and Self-Access Center Room for Japanese Studies.

FIB UNAIR has also carried out international partnerships through student exchanges, research collaboration, staff exchanges, and a double degree program. The partnerships are established with University Malaysia, Bukidnon State University Philippines, The University of Sydney, Universitas Kebangsaan Malaysia, Tokyo University of Foreign Studies (TUFS), and Singapore University of Social Sciences.

Along with these various activities and collaborations, two programs have received international accreditation. They are ASIC (Accreditation Service for International Schools) and AUN (ASEAN University Network) for Program in English Language and Literature. FIBAA (Foundation for International Business Administration Accreditation) for Linguistics.

FIB graduates have great opportunities to work in several companies, either State-Owned Enterprises (BUMN) or private enterprises. They can work for the Cultural Heritage and Preservation Unit; Banks; Tourism Offices; National Archives of the Republic of Indonesia and Regional Archive Offices; Ministry of Home Affairs and Foreign Affairs; Ministry of Education Culture, Research, and Technology; Ministry of Social Affairs; Indonesian Institute of Sciences (LIPI); mass media (as journalists); lecturers of Higher Education; and other areas.

**FIB UNAIR HAS ALSO CARRIED OUT INTERNATIONAL PARTNERSHIPS THROUGH STUDENT EXCHANGES, RESEARCH COLLABORATION, STAFF EXCHANGES, AND A DOUBLE DEGREE PROGRAM.**

## FACULTY OF NURSING

The Faculty of Nursing (FKp) Universitas Airlangga originated from the opening of the Nurse Educator Diploma IV (Four-year vocational) Program in November 1997 under the management of Faculty of Medicine Universitas Airlangga (FK UNAIR). The establishment of the Nursing Science Program (PSIK) at the Faculty of Medicine resulted from a joint effort from the Ministry of Education and Culture, the Ministry of Health, and other related institutions with intensive workshops since 1998. In December 1997, a Nursing Working Group was formed in the Medical Science Consortium of FK UNAIR. On June 20, 2008, the Decree of Rector No. 5404/J03/OT/2008 declared that PSIK FK UNAIR changed its status to Faculty of Nursing (FKp).

The Faculty of Nursing facilitates its students to become professional nurses in terms of science (knowledge), attitude, and skills. It aims to create an image of a knowledgeable, open-minded, virtuous, and skillful nurse. During the pandemic, FKp UNAIR contributed to the community by collaborating with the Surabaya Municipality to trace Covid-19 in Surabaya. It also sends nursing volunteers to the Indrapura Field Hospital and Covid-19 Referral Hospitals, contributes to the success of the vaccination program in Surabaya, and carries out community service on Covid-19 transmission-based precaution in Surabaya.

## **Specialist Degree :**

Medical Surgery (New Program)

To support learning facilities and infrastructure, Faculty of Nursing UNAIR provides a Patient Simulator, Critical Nursing Laboratory, table top disaster nursing, laboratory of basic human needs, nursing communication laboratory, and pediomaternal nursing laboratory facilitated with a waiting room, patient reception area, nurse station, and acute care patient rooms. There are also emergency sets, inpatient rooms, isolation rooms, consultation rooms for patients and families, patient dining rooms, therapy rooms (audiovisual, playground, entertainment, reading, singing), educational game sets, study rooms, and shelters for people with mental disorders (ODGJ) regarding the role of mental health nurses located in Mojokerto.

Supporting internationalization efforts, FKp UNAIR collaborates with several universities abroad, such as NCKU Taiwan, La Trobe University Australia, Universiti Malaya Malaysia, and many other universities, to conduct joint research and publications. FKp UNAIR also organizes international conference programs by inviting speakers from Asia, Australia, and Europe.

Students can also take part in the internationalization programs conducted by FKp UNAIR, such as Adjunct Professor (world-class professor), webinar series under the framework of Airlangga Public Lecture Series with A+ category speakers. Following various cooperation and internationalization programs, FKp UNAIR has gained ASEAN University Network (AUN) Quality Assurance (QA) accreditation.

**FKP UNAIR ALSO ORGANIZES INTERNATIONAL CONFERENCE PROGRAMS BY INVITING SPEAKERS FROM ASIA, AUSTRALIA, AND EUROPE.**

## FACULTY OF FISHERIES AND MARINE SCIENCES

The Faculty of Fisheries and Marine Sciences is in charge of the disciplines of fisheries and marine sciences. UNAIR established the Faculty of Fisheries and Marine Sciences (FPK) on July 25, 2008, based on the Decree of UNAIR Rector Number 5887/JO3/OT/2008 as the 13th faculty. The establishment of this faculty was developed from the aquaculture program under the auspices of the Faculty of Veterinary Medicine (FKH) UNAIR.

All FPK study programs have been nationally accredited through BAN-PT. FPK has also obtained international standardization certificates such as ISO (International Organization for Standardization), IWA (International Workshop Agreement), and Malcolm Baldrige.

“

**IN THE FIELD OF RESEARCH, FPK CURRENTLY HAS 14 TOPICS OF FACULTY RESEARCH DEVELOPMENT.**

# PROGRAMS

## **Bachelor's Degree :**

Aquaculture (Excellent)  
Aquaculture (PSDKU Banyuwangi) (B)  
Fishery Product Technology (B)

## **Master's Degree :**

Fisheries and Marine Biotechnology (A)  
Fisheries Science

Some supporting facilities complement the educational development needs of students while studying at FPK. FPK provides Microbiology and Fish Health Laboratory, Wet Laboratory, and Chemistry Laboratory. In addition, FPK educational fish pond facilities are also provided. Facilities to support references, readings, and library materials are also available in FPK reading rooms and UNAIR libraries.

In the field of research, FPK currently has 14 topics of faculty research development. The topics cover the development of natural preservatives; the development of functional food products from aquatic commodities to reduce the risk of chronic diseases and infections; characterization of morphological and genetic changes of fish as indicators of physiology and water quality; immunotoxin response of aquatic biota as bioindicators of changes in environmental conditions; mapping and characterization of potential non-fish marine resources as a food source; empowerment of coastal communities through social and economic approaches; detection of bacteria causing food poisoning; exploration of antimicrobial preparations; exploration of secondary metabolites of aquatic animals for handling aquatic biota; production of triploid fish, exploration of alternative feed ingredients in Indonesia for fish feed production; exploration of natural ingredients and pathogenic microorganisms that can be developed for the manufacture of immunostimulants, probiotics, and vaccines; as well as methods and materials to improve the quality of the aquatic environment by using only aquaponics systems and technology. In the field of community service, FPK has developed 17 fostered villages. All of them are spread in Sumenep, Sidoarjo, Surabaya, and Banyuwangi Regencies.

The faculty is actively collaborating with various parties. Domestically, FPK cooperates with seven government institutions. They are the Ministry of Marine Affairs and Fisheries of the Republic of Indonesia, the Department of Marine Affairs and Fisheries of East Java Province, the Banyuwangi Regency Government, the Livestock and Fisheries Service of Blitar Regency, the Pacitan Regency Fisheries Service, the Gorontalo Regency Fisheries Service, and the Fish Quarantine Inspection Agency, Quality Control and Safety of Fishery Products Surabaya II. It also collaborated with three companies, PT. Central Proteinaprima, PT. Matahari Sakti, and PT Surya Indoalgas.

At the international level, FPK has collaborated with nine institutions. Among them are The ASEAN-Fisheries Education Network (ASEAN-FEN) as a core member; Graduate School of Biosphere Science, Hiroshima University, Japan; Nagasaki University, Japan; College of Fisheries Science – Pukyong National University, South Korea; National Taiwan Ocean University, Taiwan; National Cheng Kung University, Taiwan; National Pingtung University of Science and Technology, Taiwan; National Kaohsiung University of Science and Technology, Taiwan; and Universiti Malaysia Terengganu. In addition, the Faculty of Fisheries and Marine Sciences opens inbound and outbound programs for both students and staff.

## FACULTY OF VOCATIONAL STUDIES

The Faculty of Vocational Studies is one of the Universitas Airlangga faculties in charge of vocational studies. UNAIR established the Faculty of Vocational Studies (FV) on May 14, 2014, based on the Decree of UNAIR Rector Number 1539/UN3/2014 as the 14th faculty. The establishment of this faculty was developed from the vocational programs which eight UNAIR faculties had previously managed since 1984. Those faculties were the Faculty of Medicine, Faculty of Dental Medicine, Faculty of Public Health, Faculty of Veterinary Medicine, Faculty of Economics and Business, Faculty of Social and Political Sciences, Faculty of Humanities, and Faculty of Science and Technology.

All programs of the Faculty of Vocational Studies are nationally accredited by two institutions: BAN-PT for non-medical programs and LAMPT-KES for medical programs.

# PROGRAMS

## Three-Year Vocational (D3) Degree:

Accounting (A)  
Medical Laboratory Technology (A)  
English (Excellent)  
Physiotherapy (B)  
Occupational Health and Safety (A)  
Tourism (A)  
Nursing (B)  
Veterinary Paramedics (A)

Information System (A)  
Dental Engineering (A)  
Library (A))

## Four-Year Vocational (D4) Degree :

Imaging Radiology Technology (B)  
Physiotherapy (B)  
Traditional Healers (B)

Some supporting facilities complement the educational needs of the Faculty of Vocational Studies' students. These facilities include banking laboratories, marketing laboratories, hospitality laboratories, multimedia studios, and the Faculty of Vocational Studies reading rooms.

The Faculty of Vocational Studies opens international programs both in the form of short semesters and webinars. The Faculty of Vocational Studies has conducted 14 international programs. They are Malaysia-Indonesia Students (Ubiquitous Colloquium); Bakulan; Mabar (Melayu Berbudaya or Cultured Malay); CHIPS (Community Health Improvement Programs); RCNs (Rural Community Nursing); BATTRA (Best Applied Traditional Treatment); LAC (Laboratory Animal Care); Physiotherapy Management for Prevention of Work-Related Musculoskeletal Disorder; Fabrication of Feeding Obturator for Newborn Cleft Palate; Radiation Protection in Diagnostic Imaging, Interventional, & Nuclear Medicine; Advance Method on Laboratory Technology; Mass Gathering Risk Assessment During Pandemic; OSH Week; and Library Tour.

## FACULTY OF ADVANCED TECHNOLOGY AND MULTIDISCIPLINE

Faculty of Advanced Technology and Multidiscipline (FTMM) was previously called School of Advanced Technology and Multidiscipline. It was established in November 2019 with five undergraduate programs, Nanotechnology Engineering, Electrical Engineering, Industrial Engineering, Robotics and Artificial Intelligence Engineering, and Data Science Technology. FTMM exists to complement the three pillars of science in Universitas Airlangga, social science, life science, and health science with a new pillar, engineering. FTMM reached 400 students.

# PROGRAMS

## **Bachelor's Degree :**

### **Nanotechnology Engineering**

Nanotechnology Engineering studies nano-scale materials. Nano-sized materials are manipulated to create a new object with desired characteristics. One of the examples of nanotechnology products is the clothes made of specially-engineered fibers that make the people wearing them stay warm in winter.

### **Electrical Engineering**

This engineering discipline concerns the study of electricity, electronics and electromagnetism and their application in daily life. It includes the concept, design, development and production process of electrical and electronic devices.

### **Industrial Engineering**

The program provides insights and knowledge needed in an industrial process, which covers various fields. It includes industrial system and process optimization, especially the efficiency and productivity aspects. Students will also study the role of the organization and human's role in an industry, so the students will also have managerial skills.

### **Robotics and Artificial Intelligence Engineering**

This engineering discipline focuses on robots and artificial intelligence development. Students will be taught how to build a robot or artificial intelligence such as Sophia, Siri, Alexa and Cortana.

### **Data Science Technology**

Data is currently considered as the most valuable currency. Learning Data Science Technology will be beneficial for the future. It is a multidisciplinary field that uses scientific methods, algorithms and systems to acquire an in-depth understanding of some data, either in a well-structured or unstructured form.

In the field of research, FTMM has nine research groups. They are Food and Environment Nanotechnology; Nanotechnology and Nanomedicine; Human Factors and System Engineering; Advanced Manufacturing and Computational Approach; Data-Driven Decision Support System, Robotics and Mechatronics; Digital Health, Computational Learning, Intelligent System; Renewable and Sustainable Energy Technology; and Intelligent Power and Control Engineering.

Amid the Covid-19 pandemic, FTMM conducts collaboration with partners to develop technological innovations. For example, the development of ISYANA: disinfectant-spraying robot usable in any places. FTMM has also developed Airlangga Robotic Triage Assistant (ARTA-1), a medical assistant robot used to conduct preliminary exams to patients believed to be exposed to Covid-19.

For non-covid 19 research, FTMM has developed technological innovations in the form of Weather Station Based on Internet of Things, and Automatic Calibrator for Limit Switch Control Valve in Geothermal Power Plant.

# PSDKU

## UNIVERSITAS AIRLANGGA BANYUWANGI

It is an off-campus program situated in Banyuwangi Regency. The establishment of the program was also based on the request of Banyuwangi Regency government in the letter of General Directorate of Higher Education No. 276/E.E2/DT/2014 about the mandate of PSDKU UNAIR programs establishment in Banyuwangi. The program was established from a continuous partnership between Universitas Airlangga and Banyuwangi Regency government in developing higher education in Banyuwangi.

Universitas Airlangga offers four undergraduate programs in Banyuwangi Campus under the management of faculties in Surabaya. Accounting is under the management of Faculty of Economics and Business (FEB). Aquaculture is in the Faculty of Fisheries and Marine Sciences (FPK). Public Health is managed by the Faculty of Public Health (FKM), while Veterinary Medicine is under the management of the Faculty of Veterinary Medicine (FKH). The four programs are accredited by national agencies, BAN-PT for non-medical programs and LAMPT-KES for health programs.

# PROGRAMS

## Bachelor's Degree :

Accounting (B)  
Veterinary Medicine (B)  
Public Health (B)  
Aquaculture (B)

There are two campuses in Banyuwangi. Giri Campus for Aquaculture and Veterinary Medicine study programs, while Sobo Campus is for Accounting and Public Health.

Some facilities supporting the education process in Banyuwangi include laboratories, libraries, halls, and student organization centers. Leadership and organizational development is facilitated through UNAIR Banyuwangi Student Family, Student Association (HIMA), interest and talent communities, and Semi-autonomous Board (BSO) to improve the students' soft skills.

In the field of research, PSDKU UNAIR Banyuwangi actively conducts collaborative research, either with partners or faculties in main campuses.

GRADUATES OF THE VOCATIONAL NURSING PROGRAM FROM GRESIK AND LAMONGAN CAMPUSES ARE ENCOURAGED TO BECOME SKILLED NURSES IN SOLVING NURSING PROBLEMS INDEPENDENTLY AND IN GROUPS BASED ON NURSING CARE STANDARDS.

[ners.unair.ac.id](https://ners.unair.ac.id)

## Lamongan and Gresik

# THREE YEAR VOCATIONAL NURSING PROGRAM

Lamongan and Gresik Three Year Vocational Nursing Program is part of Universitas Airlangga. This institution is called the Gresik Nursing Academy. The merger was based on a decree issued by the Ministry of Research, Technology, and Higher Education to UNAIR. This trust was given considering that UNAIR is a university with the status of PTN-BH (State Universities with Legal Entities). Therefore, standardization of the Higher Education Tri Dharma management of the Nursing academies is adjusted to UNAIR standards. Especially in terms of lecturer collaboration, practices, TOEFL, and other indicators.

The transfer of responsibility from the Gresik and Lamongan Regency governments was started on January 1, 2018. The ratification of the institution merging was carried out on January 2, 2018, based on the Decree from Rector of Universitas Airlangga Number 63/UN3/2018. Henceforth, Gresik Nursing Academy and Lamongan Nursing Academy officially became the Three Year Vocational Nursing Program of Universitas Airlangga in Gresik and Lamongan.

Through the Student Admission Center (PPMB), the three-year vocational Nursing Program, Faculty of Vocational Studies, Universitas Airlangga in Gresik, and Lamongan accepted a total of 220 new students in 2018/2019 academic year. For its services, the program in Gresik and Lamongan campuses have 14 permanent lecturers from the previous Nursing Academy, 14 lecturers from the Nursing Faculty, and several other expert, including the support of 25 administrative staff.

## PROGRAMS :

Three Year Vocational Nursing Program (B)

The facilities provided are basic nursing laboratory, mental and community laboratory, mini-hospital, laboratory warehouses, maternity nursing laboratory, reading rooms, and other supporting facilities. Graduates of the Vocational Nursing program from Gresik and Lamongan Campuses are encouraged to become skilled nurses in solving nursing problems independently and in groups based on nursing care standards. As qualified nurses, graduates also act as communicators, providers, managers of nursing care, and research assistants.

In the field of research, collaborative research between lecturers and students were conducted, and they got research funding in 2020. For example, a study entitled "Determinants and Impacts of Ethical Behavior in Nursing Care and Nurse Caring Behavior on Patient Satisfaction" and "Experience of Women with Very High-Risk Pregnancy in Hospital Ante Natal Care."

**DETERMINANTS AND IMPACTS OF ETHICAL BEHAVIOR IN NURSING CARE AND NURSE CARING BEHAVIOR ON PATIENT SATISFACTION**

## POSTGRADUATE SCHOOL

UNAIR established Postgraduate School (SPS) based on the Decree of the Rector of Universitas Airlangga Number 2444 / PT03.H/E/1992. This establishment is a development of the postgraduate program, which was previously known as the Postgraduate Faculty.

The programs have gained national and international accreditations. The national accreditation is from BAN-PT for non-health programs and LAMPT-KES for health. Some programs have been accredited by AFSN (Asia Forensic Sciences Network) and ABEST 21 (The Alliance on Business Education and Scholarship for Tomorrow).

“

**IN THE FIELD OF EDUCATIONAL DEVELOPMENT, POSTGRADUATE SCHOOL ACTIVELY COLLABORATES WITH INTERNATIONAL RESEARCHERS.**

# PROGRAMS

## Master's Degree :

Forensic Science (A)  
Immunology (A)  
Police Science Studies (B)  
Disaster Management (B)  
Human Resources Development (A)  
Science in Law and Development (A)  
Health Economics\*  
Data Analytics\*

Creative Industry\*  
Venture Creation\*  
Population Administration\*  
Women Empowerment\*

## Doctoral Degree :

Human Resource Development (A)  
Science in Law and Development\*

\*New Program

Postgraduate School of Universitas Airlangga also has Executive Learning Hub (ELH), a Non-Degree Program Unit under the coordination of the Postgraduate School Director, that provides services to executives / directors / managers in companies for upgrading knowledge through training activities / short courses. The training or short courses provided are on Business, Management, Law, Data Science, and Scientific Article Publications.

In the field of research, Postgraduate School Universitas Airlangga has five research study centers, the Center of Good Governance and Bureaucracy Reform; Center of Women Empowerment in Law Enforcement; Center of Civil Society; Center of Environmental and Sustainable Energy; and Center of Creative Industry.

In the field of educational development, Postgraduate School actively collaborates with international researchers. The program is in the form of guest professors, international lectures, and visiting professors, including through international conference activities and Online Summer School.

# LIBRARY

[www.lib.unair.ac.id](http://www.lib.unair.ac.id)

Universitas Airlangga has three libraries, one in each campus (A, B, and C). Of the three libraries, the central library is on campus B. Consisting of 29 librarians and 19 administrative staff, a total of 48 employees are ready to help meet the information needs of users. The following is information about the services, facilities, partnerships, and contacts of the UNAIR Library.

## SERVICES :

### 1. Information Source Service

#### a. Printed Services

- Repository Collection
- General Collection
- Special Collection
- Referential Collection
- Journal and Magazine Collection
- Center for Public Policy Studies (CPPS) Collection
- Nederlandsche Indische Artsen School (NIAS) Collection
- Satria Airlangga Corner Collection
- Nation Building Corner Collection
- FISIP Corner Collection
- American Corner Collection
- Aussie Banget Corner Collection

\*Some of the collections above can be accessed through <http://ailis.lib.unair.ac.id>.

#### b. Printed Services

- Institutional Repository (IR)  
Institutional Repository is a set of services to collect, store, preserve, and disseminate collections in digital form. It can be accessed through <https://repository.unair.ac.id/>.
- E-journals  
E-journals provide electronic journal services that can be accessed in full-text via a Virtual Private Network (VPN) Remote Access connection. Registration can be done via <https://cak.unair.ac.id>.
- E-books  
E-books provide digital book services both in Indonesian and English.
  - Indonesian services utilize Kubuku application in the iPustaka PUA which can be downloaded in <https://kubuku.id/download/ipustaka-pua/>.
  - English services can be accessed through a Virtual Private Network (VPN) Remote Access. Registration can be done via <https://cak.unair.ac.id>.
- Datasheets  
Datasheets provide comprehensive database services. Datasheets can be accessed by contacting the Official Whatsapp number +6282231517409.
- Citation Databases  
Citation Databases provide databases for citations or scientific literatures with International reputations. Citation Databases can be accessed with a VPN connection.

## 2. Circulation Services

Circulation services are provided both on-site and off-site. Books can be borrowed online through the Online Public Access Catalog (OPAC) <http://ailis.lib.unair.ac.id/opac>.

## 2. Library Class Services

- Library 101
- Online Research Management (ORM)
- Literature Review
- Reference Manager Mendeley
- Optimizing Microsoft Word
- Avoiding Plagiarism
- Journal Clinic
- Online Presentation Media

\*Registration on Library Classes can be done through the library's website at [www.lib.unair.ac.id](http://www.lib.unair.ac.id).

## FACILITIES :

- Wiyata Room
- Narayana Room
- Individual Study Rooms
- Libcafe

# UNIVERSITAS AIRLANGGA HOSPITAL

[rumahsakit.unair.ac.id](http://rumahsakit.unair.ac.id)

At the end of 2007, the Universitas Airlangga Teaching Hospital began to be built. The construction of the Universitas Airlangga Teaching Hospital is based on the strong desire of Universitas Airlangga to serve the nation and state through health development in line with the vision and missions of Universitas Airlangga.

In late 2010, the Universitas Airlangga Teaching Hospital completed the macro construction of eight floors, although only a few floors were micro-operable. In early 2011, the Decree of Rector was issued regarding the appointment of the Head of Universitas Airlangga Teaching Hospital. Since then, intensive and integrated activities had been carried out to prepare for the opening of Universitas Airlangga Teaching Hospital around June 2011.

On March 9, 2011, a Permit Approval from the Head of the Surabaya Municipal Health Service was issued regarding the permit to establish the Universitas Airlangga Teaching Hospital and the temporary permit to operate the Universitas Airlangga Teaching Hospital. Thereafter, the name of the Universitas Airlangga Teaching Hospital was changed to Universitas Airlangga Hospital.

Supported with a Permit Approval from the Head of the Surabaya Municipal Health Office, promotion of the Universitas Airlangga Teaching Hospital, and patient service simulations were carried out with satisfactory results. Therefore, based on that background, June 14, 2011, was settled as the day of "Inauguration of the Universitas Airlangga Hospital in the Early Stage (Soft Opening)".

The government has appointed Universitas Airlangga Hospital (UNAIR Hospital) to conduct a pilot project for teaching hospitals in Indonesia. UNAIR Hospital, which provides services to patients of the Social Security Administrator for Health (BPJS Kesehatan), also has excellent resources, services, and facilities.

UNAIR Hospital does not only provide medical services but also organizes activities for the elderly, research visits, free cataract surgery, and other purposes. In 2015, UNAIR Hospital was awarded "The Most Trusted Hospital and Quality Service of The Year."

As a teaching hospital, UNAIR Hospital provides supporting facilities for educational activities such as lecture rooms, study rooms, Medical Specialist Education Program (PPDS) rooms, discussion and coordination rooms, resident rooms, and research ethics rooms.

Excellent services are provided through the Geriatric Clinic, Airlangga Aesthetic Center, Surabaya Neurosurgery Center, Varicose Clinic, Integrated Complementary Traditional Health Service Unit, Microtia Center, Integrated Oncology Clinic, and Integrated Digital Design Research Center for Medical (IDIG-RCMED) as a collaboration unit with the Sepuluh Nopember Institute of Technology (ITS).

Microtia Center, Integrated Oncology Clinic, and Integrated Digital Design Research Center for Medical (IDIG-RCMED) as a collaboration unit with the Sepuluh Nopember Institute of Technology (ITS). There are also hemodialysis units, inpatient services, ICU/ICCU/NICU/PICU, 26 specialist and subspecialist clinics, Medical Check Up services, radiology and laboratory units, Home Care Units, and 24/7 Ambulance and Emergency Installation.

The hospital, receiving the highest accreditation from the Hospital Accreditation Commission (KARS) and international accreditation in 2019, is currently supported by 121 specialists, 32 general practitioners and dentists, 336 nurses and midwives, and other staff reaching 827 in total.

During the pandemic, UNAIR Hospital has become one of the main referral hospitals for handling COVID-19. In fact, UNAIR Hospital is very active in providing health services for the recovery of COVID-19. All elements in UNAIR Hospital, both human resources and supporting facilities, are mobilized to the maximum extent to provide good services.

Universitas Airlangga Teaching Hospital (UNAIR Hospital) and Telkom Institute of Technology of Surabaya (IT Telkom Surabaya) have collaborated to create a multifunctional Self-Diagnosis Kiosk to minimize the transmission of contact between medical staff and patients during the provision of healthcare services.

UNAIR Hospital is also actively conducting research and innovation related to the health sectors and Covid-19 handling. Some innovations are the Integrated Digital Design Research Center for Medical (IDIG-RCMED) in collaboration with ITS, AIRBILISUN to detect and treat hyperbilirubinemia in children, the Self-Diagnosis Kiosk in collaboration with IT Telkom to cut time examination time from 4 hours to 2 hours, and other innovations. In the IT field, Prof. Dr. Nasronudin said that RSUD had launched Si Perdana of UNAIR Hospital. With this innovation, UNAIR Hospital facilitates E-Registration, E-Medical Record, E-Laboratory, E-Radiology, and other services.

# PUSAT BAHASA DAN MULTIBUDAYA

[pusatbahasa.unair.ac.id](http://pusatbahasa.unair.ac.id)

## THE ORGANIZATION :

PUSAT BAHASA is a work unit under the Faculty of Humanities, Universitas Airlangga, which was established to provide one-stop language services. This unit offers three well-established programs: Language Training, Language Testing, and Translation.

PUSAT BAHASA has established cooperation with a number of organizations outside Universitas Airlangga such as banks, companies, government agencies, and educational institutions. The projects conducted include Conversation Class for Social Affairs Office (Dinsos) of East Java, TOEFL® ITP for the Staff of Pelindo III, TOEFL® ITP for Bank Mandiri Staff Recruitment, TOEFL® ITP for Staff Promotion of Bank Jatim, and Teachers Training for Schools in East Java.

PUSAT BAHASA is committed to providing excellent testing, training, and translation services. It has experienced and qualified instructors ready to help every customer.

## SERVICE :

With its 3-core services namely language training, testing, and translation, PUSAT BAHASA DAN MULTIBUDAYA (PUSBAMULYA) has played a significant role in supporting internationalization and nurturing multiculturalism within and beyond UNAIR, cultivating global citizenship.

Having a long history of English training experience, PUSBAMULYA offers both UNAIR academic members and public a diverse English training program including General English Class, Conversation Class, English for Office Communication, English Preparation Class for Exams (ELPT, TOEFL ITP®, and TOEIC®), English for Specific Purposes (ESP), and English for Academic Purposes (EAP). Other available classes of foreign language include Dutch, German, French, Taiwanese Mandarin, Arabic, Japanese, and Polish language courses. It also offers foreign students of Universitas Airlangga and foreign people working in Indonesia BIPA (Bahasa Indonesia untuk Penutur Asing/Indonesian Language for Speakers of Other Languages). Custom programs are available to better suit each customer's needs.

PUSBAMULYA has been managing to hold several language testing programs. The English language testing programs comprise ELPT, TOEFL ITP®, TOEIC®, and English Score. NAT-TEST Japanese language test is also available.

The translation service of PUSBAMULYA incorporates (1) translating, (2) editing & proofreading, and (3) interpreting programs.

In addition to the existing 3-core services, PUSBAMULYA collaborating with LIPJPHKI (Innovation, Journal Development, Publications, and Intellectual Property Rights Institute) and AMCORE (American Corner) of UNAIR, earning the 2021 Academic Writing Center (AWC) Support Funds Program funded by US Embassy Jakarta – The Regional English Language Office (RELO), has been preparing to fully launch and operate Academic Writing Center to support all academic members to become more confident and competent writers in an academic setting. It is expected to help students and academicians to produce creative and scholarly papers that are logical, critical, and effective in their scholarly endeavors, enhancing their mastery of Academic English.

## THE LOCATION :

PUSBAMULYA strategically lies on the 7th Floor of ASEEC (Airlangga Sharia & Entrepreneurship Education Center Tower) in Campus B. The building is the latest recognized UNAIR's landmark to symbolize its commitment to advancement.

# UNIVERSITAS AIRLANGGA INFECTIOUS DISEASE HOSPITAL

[rski.unair.ac.id](http://rski.unair.ac.id)

Tropical and infectious diseases in Indonesia remain significant health problems because the morbidity and mortality rates are still high and because of **their wide impact in the economic, political, social, educational, and security fields**. Various deadly infectious diseases leading to disabilities and incapacities such as **HIV-AIDS, tuberculosis, malaria, dengue fever, hepatitis, leprosy, and diarrhea**; and various epidemic diseases such as **avian flu, swine flu, SARS**, and other epidemic diseases carried by animals (**zoonosis**) remain serious threats in Indonesia.

Recently, there have been many reports of changes in the microbiological, pathological, and epidemiological properties of numerous microorganisms that cause the diseases mentioned above and the emergence of enormous kinds of resistance to various drugs that were originally sensitive. Diseases that were previously thought to have been resolved are now re-emerging with diverse variations as if they were new diseases. This situation forces us to constantly, regularly, and conceptually conduct observations and research on various changes in the pattern of these dangerous infectious diseases. The fact that our people's socio-economic and education level are still low forces us to seek solutions for the most effective and efficient ways of coping.

To date, various ways to control and prevent tropical and infectious diseases are mostly still based on data from research results abroad, which are often different from the reality on the field. This condition causes us to be unable to carry out countermeasures and prevention effectively and efficiently. Universitas Airlangga as an educational institution has long been aware of this as evidenced by the establishment of a tropical disease research center (TDRC), which later became TDC and ITD (LPT) since 1991, as well as "Biosafety Level" (BSL 3) as a vaccine manufacturing project for avian flu. In addition, Universitas Airlangga has been operating a Teaching Hospital.

Due to the achievements and abilities shown by the experts from Universitas Airlangga, the Ministry of Health has approved the construction of the Tropical and Infectious Disease Hospital in Campus C Universitas Airlangga, which is intended to be a hospital for tropical and infectious diseases research. The construction was started in 2008 with various sophisticated laboratory diagnostic tools. This Tropical and Infectious Disease Hospital is expected to create synergy with three pre-existing institutions (ITD, BSL-3, and Teaching Hospital) to establish a Health Science Center Universitas Airlangga, which can be a reference source in solving various health problems, particularly tropical and infectious diseases. This is a form of national responsibility since our country is a tropical country that still bears many infectious disease problems. However, the journey to becoming a research hospital was not easy because the legislation in the country did not yet exist. Therefore, to get an operational permit, this hospital had to become a service hospital. Thus, on December 1, 2015, the East Java Provincial Health Office gave an operating permit for the hospital under the name UNAIR SPECIAL HOSPITAL FOR INFECTIOUS DISEASES (RS KHUSUS INFEKSI UNAIR). Hopefully, this Special Hospital for Infectious Diseases together with ITD, BSL-3, and Teaching Hospital will produce various policies for effective and efficient solutions to various Tropical and Infectious diseases problems. Additionally, the Special Hospital can be a national referral center which is also a center for clinical trials of various biological products, including vaccines and herbal medicines.

# UNIVERSITAS AIRLANGGA

# DENTAL HOSPITAL

[rsgm.unair.ac.id](http://rsgm.unair.ac.id)

**Universitas Airlangga Dental Hospital (RSGM) has an emergency facility (IGD) ready to operate 24 hours. Even though it only received a permanent operational permit on December 1, 2016, UNAIR RSGM has been operating since 2002. Its form has changed from a dental treatment center to a polyclinic.**

The dental hospital is equipped with various excellent facilities. The inpatient care unit provides five adult beds and two children's beds, while the intensive care unit (High Care Unit) has two beds, two large operating rooms, and three recovery room beds. There is also a nutrition installation and a sterilization center for dental and oral surgery (Central Sterilization Service Department).

The General Service Unit has general practitioners who are always on standby, equipped with standard equipment. The general service department also cooperates with some units such as laboratory installation, radiology installation, and other related service units.

The essential dental services include basic dental examination, tartar cleaning, filling, nerve canal treatment, making dentures, children's dental care, oral and gum disease treatment, tooth extraction.

## **CLEFT LIP AND PALATE PATIENTS SERVICES :**

Universitas Airlangga Dental Hospital (RSGM) provides services for treating cleft lip and palate, including its preparation before surgery. The preoperative preparation includes the creation of a bottle-feeding obturator which helps assist infants with cleft palate in receiving oral intake.

## SPECIALIST DENTAL CARE SERVICE

It offers dental health services for individuals and families provided by professional dental specialists. The offered specialist dental services include :

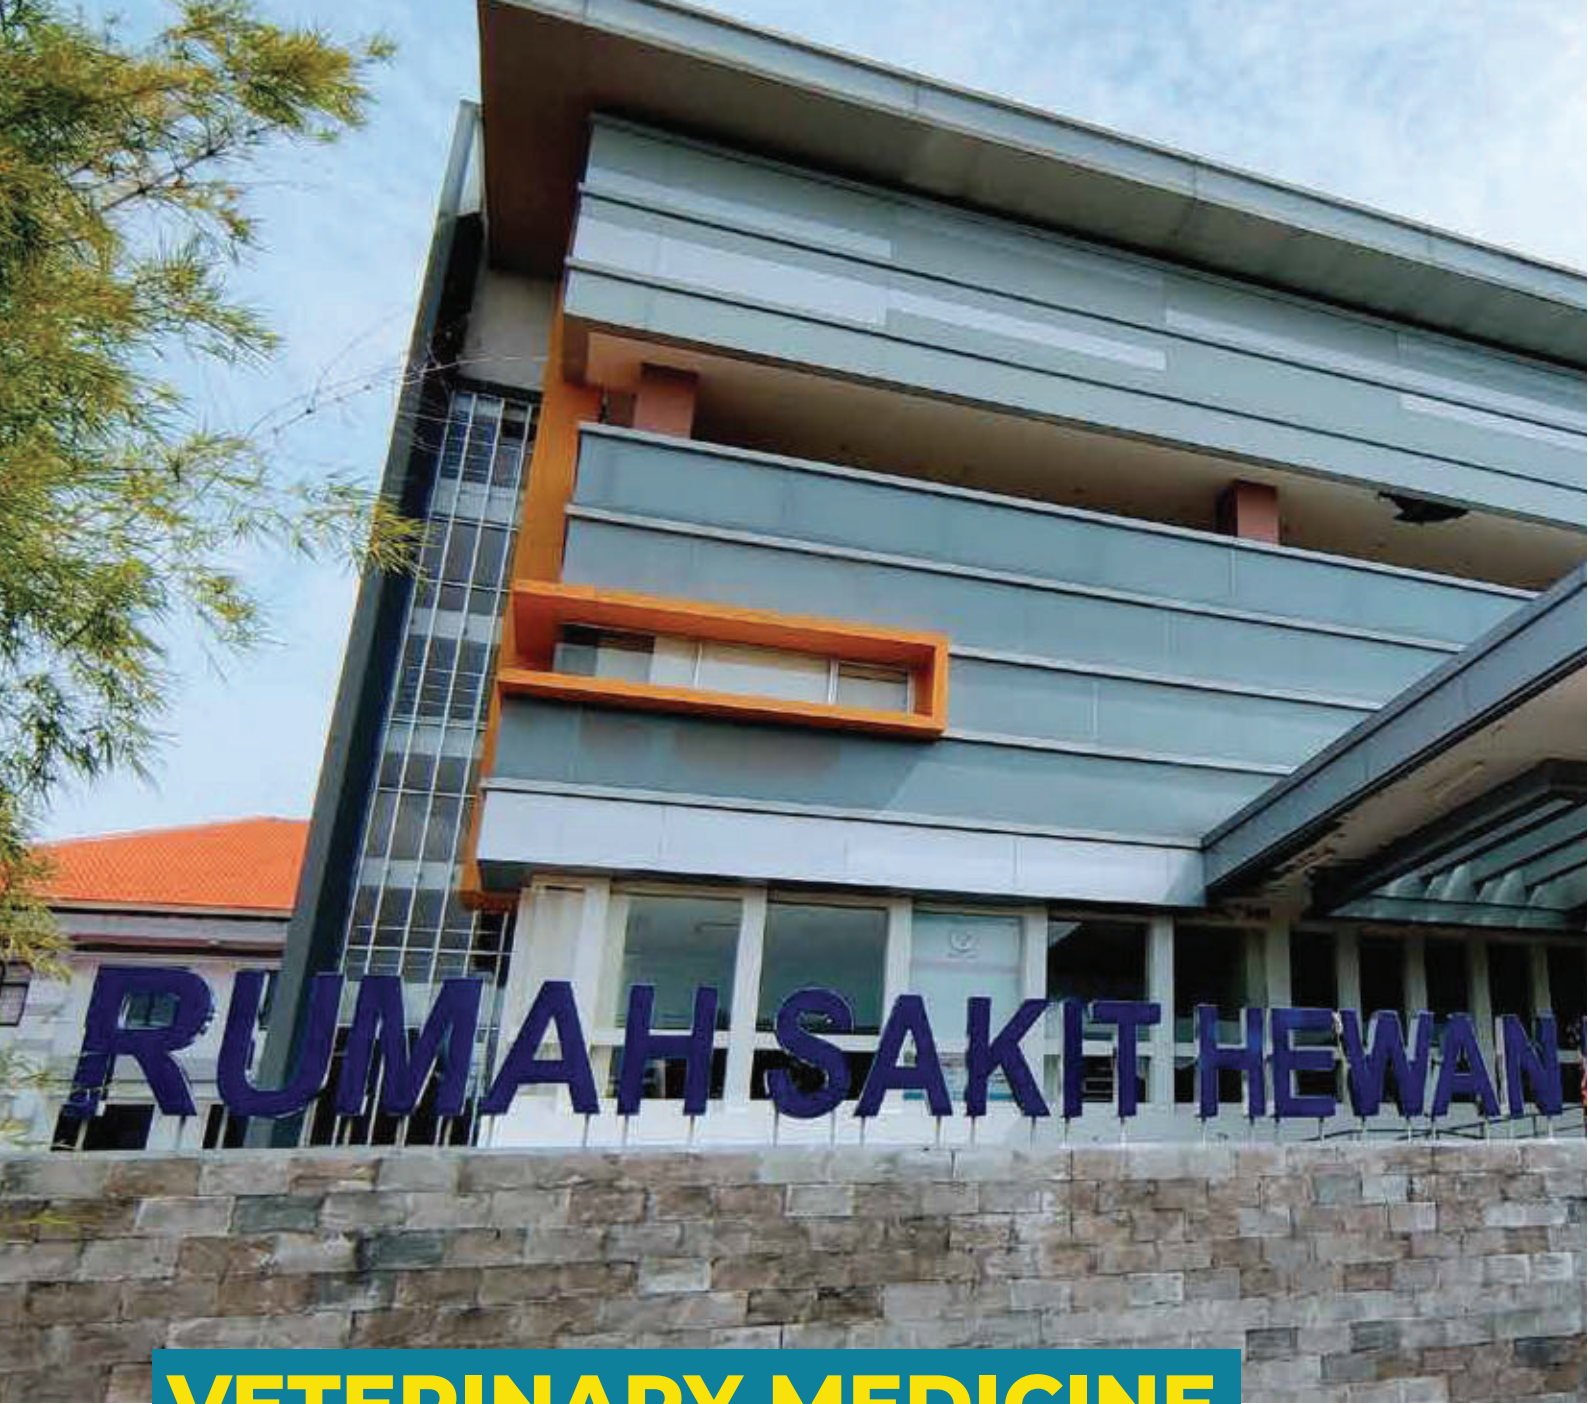

Pedodontics  
Conservative Dentistry  
Oral Diseases  
Orthodontics

Periodontics  
Oral Surgery  
Prosthodontics

## SUPPORTING FACILITY :

Inpatient service  
Dental Laboratory  
Ambulance Service

Emergency service  
Dental Radiology

**VETERINARY MEDICINE**

**TEACHING HOSPITAL**

[rshp.unair.ac.id](http://rshp.unair.ac.id)

Veterinary Medicine Teaching Hospital is one of the prestigious units of Faculty of Veterinary Medicine (FKH) UNAIR. The hospital was established with a vision to be an excellent veterinary hospital with modern facilities and infrastructure, to foster professional and competent veterinary hospital human resources that uphold ethics and achieve outstanding service quality and public trust and satisfaction. The four-story hospital is located on Campus C UNAIR, right next to Faculty of Veterinary Medicine on Jalan Dharmahusada Permai, Mulyorejo. The hospital was officially inaugurated in April 2018. However, this hospital has been operating since 2004.

The inauguration of this hospital was also an effort to prepare qualified graduates. It is a part of UNAIR's mission to be a world-class university (WCU).

The inauguration of the Veterinary Medicine Teaching Hospital adds to the list of hospitals owned by UNAIR. Universitas Airlangga Hospital (RSUA) was inaugurated in 2011, and the Dental Hospital (RSGM) in 2016.

The hospital is expected to expand the scope of veterinary services provided for livestock commodities and pets. The hospital is also referred by vets, regional laboratory and veterinary health centers (Puskesmas) in East Java. This hospital opens on weekdays (Monday-Friday) from 8 AM to 5 AM. On Saturday, it opens at 9 AM and closes at 1 PM. The clinics provide services to 75 patients in a day. In the future, one hundred patients are targeted in one day.

Veterinary Medicine Teaching Hospital of Universitas Airlangga is expected to perform three functions, providing veterinary service, conducting education, and giving recreational service. The first one is about providing medical treatments to animals. For its educational role, the academic community of Universitas Airlangga, resident students, or instructors are always involved in the service. For the last function, there is a vaccination and grooming service for pets. It is aimed to provide comforts to animals.

**THE SYNERGY OF FACULTY OF VETERINARY MEDICINE AND THIS HOSPITAL IS AIMED TO OPTIMIZE THEIR ROLES, ESPECIALLY FOR THE LEARNING OR EDUCATION ASPECT. THE HOSPITAL IS EXPECTED TO IMPROVE THE COMPETENCIES OF FACULTY OF VETERINARY MEDICINE GRADUATES.**

## INTERNATIONAL CERTIFIED AND ACCREDITED PROGRAMS

### ASEAN University Network (AUN) Quality Assurance

AUN recognizes the importance of quality in higher education, and the need to develop the holistic quality assurance system to raise academic standards and enhance education, research, and services among its member universities.

Therefore, as one of its activities, AUN initiated AUN-QA (Quality Assurance) to support, enhance, and sustain the level of quality assurance practiced by the higher education institutions in ASEAN. AUN-QA conducts a systematic, structured and continuous assessment in the member universities. It is a self-assessment by writing SAR (Self-Assessment Report).

The papers' completeness is then confirmed and Action for Improvement is formulated from the result of SAR. After that, the reviewer team visits the university, to assess and review the self-assessment report.

**AUN-QA HAS CERTIFIED 17 PROGRAMS OF UNIVERSITAS AIRLANGGA.**

## ASIIN

ASIIN, stands for Accreditation Agency for Degree Programs in Engineering, Informatics/Computer Science, the Natural Sciences, and Mathematics, is a non-profit higher education accreditation organization from Germany acknowledged by international academic communities.

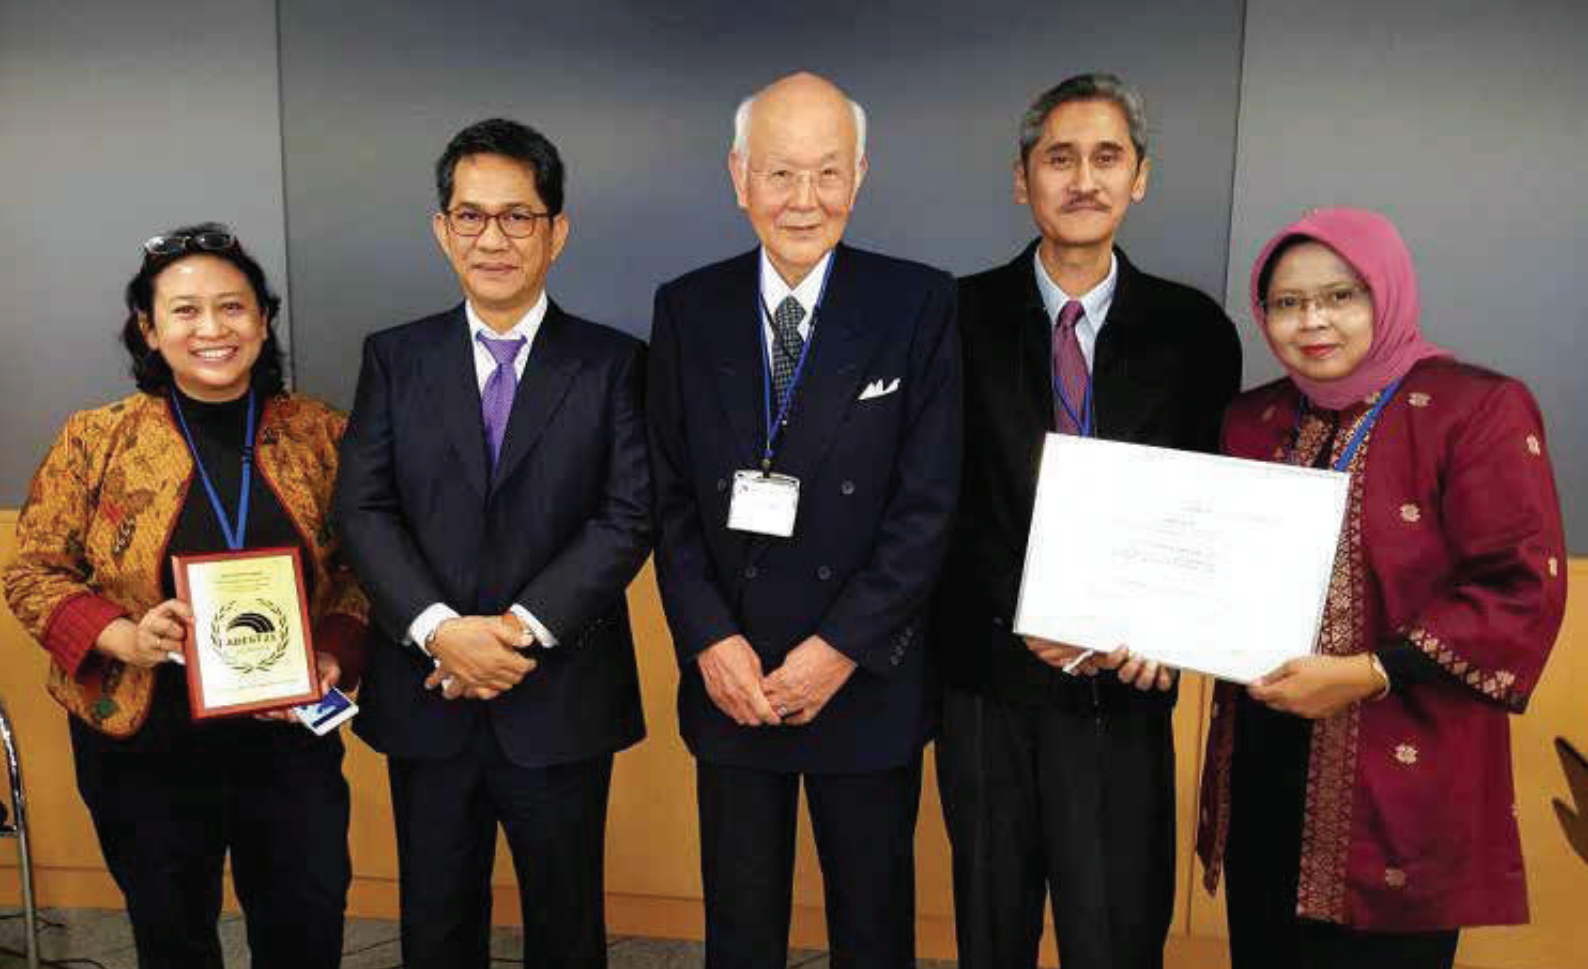

ASIIN offers accreditation for better education quality, or an excellent institutional management system in the field of engineering, informatics or computer science, natural sciences and mathematics. In the accreditation process, the quality parameter is evaluated systemically, in an integrated manner.

ASIIN views “education” as a developmental and learning process to acquire various competencies and outcomes. The result of education should support the individual, social and professional developments. ASIIN has accredited 26 programs of Universitas Airlangga.

**ASIIN HAS ACCREDITED 26 PROGRAMS OF UNIVERSITAS AIRLANGGA.**

## ABEST 21

ABEST21 or The Alliance on Business Education and Scholarship for Tomorrow, a 21st century organization, is based in Tokyo, Japan. It was founded in 2005 and recognized as an international business accreditation agency for business schools in the Asia-Pacific region. It has 60 business schools from 11 different countries as members.

The mission of ABEST21 is to advance education in business schools on a global basis by encouraging mutual cooperation among its member institutions to face the challenges in the 21st century. Some prominent Asian companies such as Toshiba, Sony, Toyota Motor, Panasonic, Fuji, Xerox, Nissan and Kodak have been partners of this accreditation agency.

This accreditation agency has a long history. In 1994, seven business schools from Japan and abroad joined together in a Global Classroom Conference and the conference was reorganized as the Global Knowledge Network on June 28, 2002.

System development became an urgent issue for the Global Knowledge Network, especially to enhance the quality of management education at the business schools.

**ABEST21 HAVE ACCREDITED 15 PROGRAMS OF UNIVERSITAS AIRLANGGA.**

## ASIC

ASIC stands for Accreditation Service for International Schools, Colleges, and Universities. It is an international accreditation institution based in the United Kingdom (UK) and organized by the UK Home Office. ASIC has gained ISO 9001: 2015 accredited certification.

ASIC is one of the international accreditation institutions chosen by Universitas Airlangga to improve its educational quality. ASIC has been acknowledged and affiliated with the world's prominent education organizations, such as CHEA International Quality Group in the USA, British Quality Foundation, ENQA, European Association for Quality Assurance in Higher Education, GUIDE Association, Global Universities in Distance Education, UN Academy Impact group, and The Association of International Education Administrators (AIEA).

**UNIVERSITAS AIRLANGGA HAS GAINED ASIC ACCREDITATION FOR 14 PROGRAMS.**

## FIBAA

Foundation for International Business Administration Accreditation (FIBAA) is a European Agency oriented to quality assurance and quality improvement of higher education institutions. FIBAA is also one of the international accreditation agencies registered in the Indonesian Ministry of Education, Culture, Research and Technology.

**THREE PROGRAMS OF UNIVERSITAS AIRLANGGA HAVE GAINED FIBAA ACCREDITATION.**

## APHEA

APHEA is committed to assuring and improving the quality of educational activities throughout the globe. Accreditation is aimed at supporting the continued amelioration of education and training for public health workforces throughout the world by providing an international and transparent quality recognition. APHEA accreditation is available to any public health institutions, programs or training courses.

“

ONE PROGRAM OF UNIVERSITAS AIRLANGGA IS ACCREDITED BY APHEA.

# INTERNATIONAL PROGRAM

[global.unair.ac.id](http://global.unair.ac.id)

Through Airlangga Global Engagement (AGE), Universitas Airlangga continues to innovate to attract international students to join programs at UNAIR. The following are the details of AGE programs, both new programs and programs with high demand.

## **AMERTA ONLINE (Academic Mobility Exchange for Undergraduate at Airlangga)**

AMERTA calls outstanding students to study and experience the diverse culture of Indonesia, especially the local East Java atmosphere, for one or two semesters. This program is available for international students interested in several uniquely Indonesian perspective subjects in social, cultural, economics, natural sciences, life sciences, and health sciences. Inaugurated in 2014, it was successfully conducted for its first batch. All courses are fully delivered in English. Students are provided with Indonesian language learning and cultural trips during the program. Field studies are compulsory in some courses to integrate theoretical perspectives into practice.

## **LINGUA (Learning Indonesian Language at Universitas Airlangga)**

LINGUA is specially designed for international students who wish to expand their knowledge and experience in learning Indonesian language and culture. This program comprises two learning programs: LINGUA Level A1 and A2, which focus on the beginner-level lessons and LINGUA Level B1 and B2, which consists of intermediate-level lessons. The participants will take a placement test to determine which level their Indonesian language capability belongs to in order to be able to begin their lesson. Through synchronous and asynchronous online meetings, 14 meetings in total per level, the participants will improve and develop their life skills in the Indonesian language and cultural understanding.

### **INDIAR (Indonesian Diversity at Airlangga)**

A five days end of year break session at Universitas Airlangga to learn the diversity of Indonesia. The participants will experience and acknowledge enormous cultural diversity and complexity, including ethnicity, race, language, religion, etc.

### **IN-HERIT (Indonesian Heritage Course) Joint Summer Program UNAIR-UNS**

Indonesian Heritage (In-Herit) is a ten days summer program conducted for International Students to experience heritage in Indonesia. This program focuses on health science aspect, including traditional medicine of Indonesia. It also offers cultural exposure and a joint course between Universitas Airlangga and Universitas Sebelas Maret.

### **TAILOR-MADE PROGRAMS**

Universitas Airlangga tailor-made programs offer colleges and universities worldwide the opportunity to create a study abroad program in Indonesia that fits specific needs and interests. These programs can be focused on specific content themes as well as English language skills. Programs' length can range from one week to one month or more and can take place on the UNAIR campus or onsite at the chosen location. Universitas Airlangga strives to bring you innovative ideas and educational challenges. We aim to develop programs that meet specialized requirements for unique subject areas and audiences. The previous program included Airlangga-KOC Summer Camp in 2018. Requested by KOC University, Turkey, the theme revolves around Sociopreneurship in Surabaya and Bali. Since 2016, we have been facilitating an annual tailor-made program requested by Miami Dade College, USA. Adopting multiculturalism as a theme, the program is held around the Eastern Java region, exploring the region's vast diversity.

### **AIRVENTURE (Airlangga Adventure)**

Airventure is an international program focused on life science aspects for initiating knowledge about the natural resources of Indonesia. The students are expected to get experience about natural conservation. They are encouraged to participate in protecting, preserving, managing, and restoring wildlife and natural resources.

### **SUMMER IN SURABALI (Joint Summer Program UNAIR-UKP-UNUD)**

This is a society empowerment program through sociopreneurship which cooperates with three excellent universities in the eastern part of Indonesia: Universitas Airlangga, Petra Christian University, and Udayana University. The participants will be exposed to Indonesian culture in two big regions, Surabaya and Bali. By the end of the program, participants are expected to have the competencies to identify sociopreneurship activities, map the challenges, and offer ideas to improve social enterprises in the global setting.
